AUDIO-VISUAL AIDS SERVICE DIVISION OF UNIVERSITY EXTENSION

UNIVERSITY OF ILLINOIS

STANLEY C. ROBINSON
DEAN OF UNIVERSITY EXTENSION

All of us engaged in the business of education are aware of the new tools developed to help us do our job more efficiently and effectively. We are certainly aware of the increased enrollments in our classrooms and the increasing amount of subject matter we are expected to teach. I firmly believe that only as we learn to use these new educational tools expertly in the classroom will we be able to adequately meet the increasing demands placed upon us.

One of the most valuable new educational tools is the motion picture. It has been with us long enough to be properly evaluated and its worth determined. However, we must remember it is only a teaching tool and must be used well by the teacher in order to produce the results of which it is capable. To this end, I suggest that every school should own copies of the leading audio-visual texts and subscribe to one or more of the leading periodicals. In addition to this, I would urge that teachers be encouraged to take training in audio-visual utilization either in summer school or through extension courses.

We all hope that the end results of our teaching efforts are students who have gained knowledge and comprehension of the subject matter we teach. There is a much better chance of success if we use as teaching tools those with which the students are familiar.

The Visual Aids Service at the University of Illinois has one of the largest and finest collections of educational films available on a rental basis. Each year many new titles and additional prints are added so that a constantly higher percentage of requests can be filled. In order to help us give you the best service possible, I urge you to follow the directions given in the first three pages of this catalog.

REMOTE STORAGE

GENERAL INFORMATION

All films are 16 mm sound films unless the film title is followed by the notation (Silent).

Index to Visual Aids Catalog lists the films most applicable within these areas.

The Descriptive Index of Films is an alphabetical listing of film descriptions which, in addition to the description, gives information regarding:

- 1. Producer or Depositor In () immediately following title.
- 2. Grade suitability: p-primary; i-intermediate; j-junior high; h-high school; c-college; a-adult.
- 3. Running time: 11 minutes; 15 minutes; etc.
- 4. Black and white and/or color.
- 5. Rental rate for basic rental period.

Customers do not need to insure return film shipments.

No films listed in this catalog may be used for television purposes without the express consent of the producer. If desired for television use, please contact the producer and not the Visual Aids Service.

We will be glad to send you practice film free of charge.

TO SECURE FILMS

Films may be rented from one to five days (Monday-Friday) at the basic rental rate.

Extended Rental Rates

One School Week	Basic Rental
Two School Weeks	1.5 X Basic Rental
Three School Weeks	2.0 X Basic Rental
Four School Weeks	2.5 X Basic Rental

Bookings will be made for only a 2-day period unless otherwise requested. Please specify exactly the desired rental period. It is too late to extend dates after a booking has been completed. We receive many requests booking films over a weekend or during the Thanksgiving and Christmas holidays. Please check your calendars very carefully.

Films must be returned no later than the day following last date of scheduled use.

Order by title exactly as listed in this catalog. There are several instances of identical film titles. Please indicate the initials of producer for the title you desire. The Visual Aids Service feels that your film

program will benefit if you grant us permission to substitute a title when the film you request is not available. The film substituted would be a film with similar content and grade placement and, in many instances, this will enable you to receive a newer film.

Give alternate dates if possible. Often the shift of a few days or a week may make a film available for your use. If films are available in both black and white and color, indicate your preference.

Notice: We will not substitute date or title without permission.

Please give us specific mailing and billing instructions — school, audiovisual department, board of education, district number, name. It helps to include a postal zone number.

Order on our booking request form or, if on your own letterhead, please double space — it cuts the booking time in half. Forms may be had upon request.

Please list films in chronological order (in order of date of use) — it also helps save booking time.

Check the confirmation forms you receive against your original order, and notify us of any discrepancies.

Please use our return labels. Although it may not seem so, it is a gummed label.

Unless otherwise requested, all shipments will be by parcel post.

CANCELLATIONS

Request for cancellation must be received by the Visual Aids Service at least 5 days before the shipping date indicated on your confirmation slip. ONLY under this condition will a cancellation of charges be allowed.

If a film is not received in time to meet its scheduled use dates please let us know within 10 days so that you will not be invoiced for the films you could not use.

Films reserved for a "will call" and not picked up, will be returned to circulation the following day, but charges will not be cancelled.

LATE RETURNS

Bookings are made on the premise that films will be returned promptly following their last scheduled date of use. If the Visual Aids Service is forced to cancel a booking because a film is held overtime without permission, the cancellation charges will be added to the bill sent to the customer holding the film.

ACCOUNTS

You will receive a statement as soon as the last film on any given order has been shipped. Invoices should not be paid until you receive an IBM statement from the University of Illinois Bursar's Office. Whenever payment is made, it is important to state which invoice is covered by your check and return a copy of the invoice and the IBM card with your remittance.

If your order to us covers several months and is \$200 or more, you will be billed monthly for the films used. If neither of these plans is acceptable, please let us know.

FILM DAMAGE

Customers will not be charged for film damage unless it is to a previously undamaged film. All other damage will be absorbed by the Visual Aids Service.

GREEN FILM

Occasionally you may receive a film which is brand new and continually loses the lower loop. The best method of correction is to hold a silicone cloth lightly on the film before it passes from the upper reel into the film gate. If this does not solve the problem, please do not continue to project the film. Return it to us with a note to this effect. Forcing a green film through a projector will result in serious and extensive film damage.

HINTS FOR GOOD FILM UTILIZATION

If you have not had the opportunity of an AV course the following suggestions will help you in preparing to use a motion picture to the greatest classroom advantage.

A. Teacher Preparation

- 1. Preview and/or study of film guide
- 2. Determine objectives to be reached by use of film
- 3. Develop questions to be asked following film showing
- 4. Plan for and anticipate follow-up activities.

B. Prepare the Class

- 1. Explain why the film is being shown and what specific points students are to look for
- 2. Questions that will be asked
- 3. Vocabulary study
- 4. If special photographic techniques have been used call this to their attention.

C. Show Under the Best Conditions Possible

- 1. Set up ahead of time if possible
- 2. Be familiar with equipment for easy use
- 3. Good ventilation and adequate darkening
- 4. Seating arrangement that prevents angular distortion.

D. Follow-Up

- 1. Discussion of previously determined questions
- 2. Discussion of new questions
- 3. Determination of further work, such as art, field trip, letter writing, collections, etc.
- 4. Teacher to keep a record of general suitability of film used. This will indicate whether film should be re-used or whether a newer film should be used.

CARE OF FILMS

The following pointers on film care will prolong film life and will make it possible to better serve all customers:

- Keep projector clean at all times. Don't allow dirt to accumulate
 in the aperture of the projector. Always use a soft cloth when
 cleaning the aperture gate never use metal that will scratch the
 smooth surface of the gate.
- 2. Thread film into projector properly. Be sure the film is engaged on all sprockets and that proper loops have been allowed above and below the aperture gate.
- 3. Turn some of the film through by hand (or with short starts) before running the film to check threading and to insure proper operation.
- 4. Check the film occasionally by letting your fingers ride lightly on the sprocket hole edge as it passes through the projector. If unusual noises or clattering occurs or if punctures develop in the film, stop the projector immediately and rethread.
- 5. If the film should become damaged, return the film with an explanatory note indicating the damaged section. Please don't patch the film with scotch tape, paper clips, or pins.

TRAINING

The Visual Aids Service offers, on a request basis, a visitation and consultation service, primarily to schools, to assist in planning and developing audio-visual programs. One of the Service Directors can visit a school or community for brief periods to assist in the solution of such problems as in-service teacher training, selection of audio-

visual materials and equipment, budget, starting an audio-visual program, cataloging, etc. It is also possible to organize an Extension Class. Letters of inquiry are invited.

RENTAL RATES SUBJECT TO CHANGE WITHOUT NOTICE

Occasionally this is necessary because of new editions, change from black and white to color, previously deposited prints which must now be purchased, or a price increase on the part of the producer.

Please check the rental charges on your confirmation sheet. Please feel free to inquire about any that do not conform to catalog rates.

DESCRIPTIVE INDEX OF FILMS

Films which are followed by an asterisk were not listed in our previous Health, Physical Education, and Sports Catalog.

ACCIDENT BEHAVIOR (prp)

j-h-c-a 18 minutes bw: \$3.65 Explains a step by step procedure to follow when involved in an automobile accident. Shows care of the injured; hazards of fire; legal responsibilities; and many other phases of accident behavior.

ADVANCED SWIMMING (of)

j-h-c-a 10 minutes bw: \$2.15 Shows techniques that are essential to championship swimmers — breathing, body alignment, and arm and leg action.

ADVANCED TENNIS (of)

j-h-c-a 11 minutes bw: \$2.15 Bill Tilden reviews tennis fundamentals and then explains some advanced techniques. Demonstrations and illustrations of net game, footwork, smash, service, and volley are photographed from front, back, side, and overhead to allow study from every angle.

ADVANCED TUMBLING (c)

j-h-c 10 minutes bw: \$2.15 Presents fourteen advanced stunts grouped in a balance progression, backward somersault progression, and forward somer-sault progression. Stresses that mastery of tumbling makes athletes less prone to injury in other more vigorous sports.

ADVENT OF ANESTHESIA (mcc)

h-c-a 10 minutes bw: \$1.65
Before anesthesia, major operations were crude and hurried because of the intense suffering of the patient. The film shows a re-enactment of the first public demonstration of the use of anesthesia, in Massachusetts in 1846. Ether was used on this occasion to render the patient unconscious and keep him from suffering pain. A new era in surgery was born.

AERODYNAMICS OF THE HUMAN BODY (caa)*

h-c-a 10 minutes bw: \$2.15 Numerous situations record the effects of winds of high velocities on the human body. Persons are exposed to wind tunnel experiments while in sitting, standing, prone, and crouched positions.

ALCOHOL AND THE HUMAN BODY (eb)

j-h-c-a 15 minutes bw: \$3.15 Explains the specific effects of alcohol on the human body; describes the characteristics of alcohol and how it is made; and traces the course of alcohol through the body until it either oxidizes or escapes. Shows the effects of alcohol on important brain centers, and dramatizes the case of a problem drinker, including his treatment.

ALCOHOL AND TOBACCO: WHAT THEY DO TO OUR BODIES (c)

j-h 10 minutes bw: \$2.25 Warns against the use of alcohol and to-bacco, and shows through a series of physical tests the effects of these substances on the normal performances of an athlete, a jugger, and a person doing detailed work. Suggests that alcohol and tobacco are unlabeled poisons and shows their effects on the body by means of medical tests of heart beat, constriction of blood vessels, and skin temperature before and after taking alcohol and nicotine into the body.

ALCOHOL IS DYNAMITE (sd)

j-h-c-a 9 minutes bw: \$2.15
Typical case histories have been selected.
These include several boys and girls who became victims of drink at an early age.
The stories are told as they occurred — without embellishment, without preaching. But the lesson is graphically evident — any boy or girl can become a victim of alcohol simply, easily, and quickly, merely by "playing around" with it.

ALCOHOLISM (eb)

j-h-a 22 minutes bw: \$4.15
Presents some causes of excessive drinking, tracing the development of the disorder in the case history of Ed Grimer. Shows how the roots of alcoholism are imbedded in personality difficulties, and describes various forms of treatment. Demonstrates the role of the public clinic, and emphasizes the need for increased treatment facilities and greater public knowledge of this widespread problem.

ALIMENTARY TRACT (eb)

j-h-c 11 minutes bw: \$2.15 Portrays the actions of esophagus, stomach, small intestine, and colon to move food and waste materials through the body. Shows normal and stimulated stomach movements such as hypermotility, inhibition, and hunger contractions; and portrays such intestinal phenomena as segmentation, peristalsis, and antiperistalsis. Demonstrates in cinemicography actual absorbing movements of intestinal villi.

ALLERGIES (eb)

allergies.

j-h-a 15 minutes color: \$3.40 Presents basic facts necessary for a fundamental understanding of the nature of allergies. Describes an allergy as a pronounced sensitiveness of a given part of the body to a particular substance such as certain pollens, dusts, foods, etc. Points out types of research now being carried on in the field and explains tests for detecting

AMBULANCE DOCTOR (mcgh)

j-h-c-a 17 minutes bw: \$3.75 Filmed at the Roosevelt Hospital in New York City, this medical story explores the experiences of a doctor as he rides the ambulance through city streets in answer to emergency calls of all kinds. Quick work of the doctor is demonstrated as he administers medical aid at the scene of an accident or disaster.

AMERICA BOWLS (nbco)

j-h-c-a 23 minutes bw: \$4.15 Outstanding American bowlers demonstrate their technique and give step-by-step instructions. Features Ned Day, Buddy Bomar, Marion Ladewig, Andy Varipapa, Joe Norris, and Connie Schwoegler.

AMERICAN SQUARE DANCE, THE (c)

j-h-c-a 10 minutes bw: \$2.15 With orchestral accompaniment, an experienced caller and a narrator explain the positions and teach such fundamental steps as the swing, alemande, grand right and left, promenade, do-si-do, and many others. The film includes the folk dance, "Take a Little Peek."

AND THE EARTH SHALL GIVE BACK LIFE (sq)

j-h-c-a 23 minutes bw: \$2.15 Explains for the layman just what the wonder drugs are, what they do, and how—when they are used—the earth is in effect actually "giving back life."

ANTIBIOTICS (eb)

j-h 14 minutes color: \$3.45 color: \$5.15 Illustrates an important new weapon in man's fight against disease. Defines antibiotics and shows how they have been used successfully in medicine. Highlights research in the development of antibiotics and calls attention to the use of antibiotics in animal husbandry and food preservation.

AQUA FROLICS (uw)

general 10 minutes bw: \$1.70 Daring thrill-seekers provide exciting and novel entertainment for lovers of sports. Basketball under water, diving from 300-foot cliffs, water ski champs, reckless canoeists in rapids, and daring outboard motor boat feats are shown.

ARCHERY FOR GIRLS (c)

j-h-c 10 minutes bw: \$2.25 With experts demonstrating, the film shows and explains the fundamental techniques of shooting: proper stance, nocking the arrow, the draw, the aim, and the loose. Stressing relaxation and practice, the film is popular with beginners and experts alike.

ARCHERY FUNDAMENTALS (bfs)

j-h-c-a 11 minutes color: \$3.80 Designed to give beginning archers basic knowledge about shooting equipment, proper methods of choosing and using it, and safety measures, together with tips that will increase enjoyment and achievement on the archery field. Demonstrations are given by both men and women, showing step-by-step procedures in preparing to shoot, sighting the target, and releasing the arrow.

ARCHERY INSTRUCTION AND SAFETY (hca)

j-h-c-a 10 minutes color: \$3.60 Explains the equipment required, the parts of a bow and arrow, how to string a bow, pulling the bow to shoot, correct release of the arrow, the correct stance, etc. Stresses also the safety precautions one should take.

ARTIFICIAL RESPIRATION: BACK PRESSURE ARM LIFT METHOD (sef)

h-c-a 6 minutes bw: \$1.65 One method of artificial respiration is the back pressure arm lift method. Correct procedures of the method are described in this film.

AS BOYS GROW (ma)

j-h-c 17 minutes bw: \$4.00 Deals with the changes that occur during adolescence. Attention is given to both primary and secondary sexual characteristics, and to the relationship between the sexes during adolescence.

ATOM AND BIOLOGICAL SCIENCE, THE (eb)

j-h-c-a 11 minutes bw: \$2.40 Demonstrates how, by taking radioiodine high energy radiations on plants and animals. Explains how typical experiments are conducted and demonstrates some of the

protective measures required to insure the safety of the experimenters. Points out some possible applications of nuclear radiation to problems of human health, emphasizing work already under way in the study of cancer.

ATOM AND MEDICINE, THE (eb)

j-h-c-a 11 minutes bw: \$2.65 Demonstrates how, by taking radioiodine internally, one man's condition was diagnosed and cured. Describes the important role of radioisotopes in hospitals, clinics, and doctors' offices. Clarifies misconceptions about the handling, dosage, and alleged dangers of radioisotope diagnosis and therapy. Shows the respect with which radiation must be treated and reveals some of the instruments and devices used to handle it.

ATTITUDES AND HEALTH (c)

j-h-c 10 minutes bw: \$2.25 Marv Baker does not make the basketball team. His sister, Alice, is actually ill because she fails to get an expected promotion. They learn from their doctor that wrong attitudes prevent the individual from doing his best, and can even cause physical illness. The film shows that both achievements and failures have meaning only in perspective, and that self-confidence and right attitudes are vital to good health.

BACTERIA - FRIEND AND FOE (eb)

j-h 11 minutes color: \$3.65 Animated drawings and live action show bacterial growth and reproduction and ways in which bacteria may be grouped for systematic study. Contributions of Leeuwenhoek, Pasteur, and Koch are related to techniques of modern bacteriology.

BADMINTON FUNDAMENTALS (c)

j-h-c-a 9 minutes bw: \$2.25 Fundamental skills and rules of badminton are demonstrated in this film by both expert and novice players. How to serve, the forehand and backhand shots, and other important playing techniques are shown, providing a valuable guide for better understanding and enjoyment of this popular game.

BALANCE YOUR DIET FOR HEALTH AND APPEARANCE (c)

j-h 11 minutes bw: \$2.35 Jane, Bill and Fred analyze their own eating habits. Bill is a breakfast-misser; Jane's weakness is greasy foods; and Fred eats more than his share of carbohydrates. As they learn more about diet, they recognize the importance of a balanced diet to weight, skin condition, and personality. The seven basic food groups are presented and illustrated.

BALL HANDLING IN BASKETBALL (eb)

j-h 10 minutes bw: \$2.15 Illustrates approved methods of holding the ball, catching it, and passing it. Emphasizes importance of relaxation, rhythm, and balance; demonstrates correct stance, grip, fingertip control, one-handed pass, and hook pass. Utilizes slow-motion and stopmotion photography to facilitate detailed study.

BALL HANDLING IN FOOTBALL (eb)

j-h 9 minutes bw: \$2.15
Analyzes receiver stance, position of hands, and importance of keeping eyes on the ball. Demonstrates correct fundamentals in catching a ball passed from center, catching punts and long passes, handling ball in close and spinner plays, and shifting ball from side to side in running. Slow- and stop-motion photography aid in detailed study.

BANNISTER WINS THE MILE RUN (YOU ARE THERE) (cbs)

j-h-c-a 27 minutes bw: \$5.65 One of the feats that man had been striving for some years to accomplish occurred on August 7, 1954, at Vancouver, Canada. "The greatest mile ever run by man" is the contest between John Landy and Dr. Roger Bannister, who prove that the "four minute mile" can be run.

BASEBALL BY THE CODE (ihsa)

general 27 minutes bw: \$2.15

Portrays official rule interpretations; demonstration of game administration, by umpires from the major and minor leagues, high schools and colleges. Play situations, performed by skilled high school, college, and professional players, correct pitching procedure, interference and obstruction, live and dead ball, trap plays, infield fly, strike zone, appeal plays, spectator participation.

BASEBALL FOR MILLIONS (ihsa)

j-h-c-a 28 minutes bw: \$2.15
A Big League Manager and an outstanding student of the game narrate play situations covering the official interpretation of basic rules of batting, pitching, base running and fielding. Recommended for use by officials, coaches, and players as well as fans.

BASEBALL FUNDAMENTALS AND TECHNIQUES (i)

j-h-a 45 minutes bw: \$7.15 Produced for the New York Giants for use by their farm clubs. Features members of the Giant team demonstrating proper batting, running, fielding, and general major league baseball techniques at every position. Introduction by Leo Durocher and narrated

BASIC MOVEMENT (pma)

by Russ Hodges.

j-h-c-a 14 minutes color: \$3.90 Peggy Lawler and Perry-Mansfield students demonstrate basic exercises intended to develop flexibility and improve the silhouette.

BASIC NATURE OF SEXUAL REPRODUCTION (CONTINUITY OF LIFE SERIES) (iu)*

h-c-a 15 minutes color: \$5.30 Uses cinephotomicrography to illustrate the processes of reproduction. Points out that although sexual reproduction may differ in plants and animals in specific detail, its basic features remain the same. Presents models of cells and chromosomes to demonstrate that through random assortment and chance union, sexual reproduction makes possible great variation which has benefited man and has insured the survival of many living things in a varied environment.

BASIC T FORMATION (gf)

h-c-a 11 minutes color: \$3.40 Shows the ground attack of the Chicago Bears, Los Angeles Rams, and Chicago Cardinals.

BASKETBALL: BASKETEERS (rko)

j-h-c-a 9 minutes bw: \$2.15 Claire Bee, and his Long Island University basketball team of 1943.

BASKETBALL: COURT CRAFT (rko)

j-h-c-a 9 minutes bw: \$2.15 Basketball techniques displayed by Utah's famous team of 1945.

BASKETBALL FOR BOYS: FUNDAMENTALS (bfs)

j-h 10 minutes bw: \$2.35 In this demonstration of basic basketball skills each fundamental is carefully presented with important teaching points emphasized by slow-motion and repeat action. Because demonstrations by professional players are sometimes frustrating to boys who cannot imitate them, these demonstrators are selected students who are capable, and who will inspire your classes to equal or surpass them. The quantity of material covered provides the teacher with

a comprehensive list of sound illustrations. Students will profit from additional viewings in addition to elaboration and emphasis by the instructor.

BASKETBALL FOR BOYS: TEAMPLAY (bfs)

j-h 11 minutes bw: \$2.35 Fundamental units of basketball teamplay are presented in this film. Five-man offense starts with one- and two-man action and concludes with a set play based upon these actions. Defensive play progresses from the defensive triangle to full team cooperation. Animation, slow-motion, and stop and repeat action are used to aid the student. The fundamental units of play illustrated in this film will provide a sound basis for students to develop their own teamplay.

BASKETBALL FOR GIRLS: FUNDAMENTAL TECHNIQUES (c)

j-h-c 10 minutes bw: \$2.15 Combining fast action and slow motion photography, skillful players, and sound basketball know-how, this film demonstrates fundamental techniques of ball handling, passing, and shooting. It emphasizes the value of practice and importance of individual skill to team success.

BASKETBALL FOR GIRLS: GAME PLAY (c)

j-h-c 10 minutes bw: \$2.15 The finer points of the sport are demonstrated here. Individual player techniques in offense and defense are shown — pivoting, feinting, passing, screening, shooting, and handling rebounds. This film will heighten the interest and increase the skill of your students.

BASKETBALL FOR MILLIONS (ihsa)

j-h-c-a 27 minutes bw: \$2.15 A fantastic dream sequence is the continuity thread used throughout the film to depict: accepted officiating procedures, problems created by double fouls and faults of double fouls, tricky situations connected with front and back court, jump ball infractions and procedures, little understood distinction between player and team control, and a panorama of basic rule fundamentals.

BASKETBALL IS FUN (bfs)

i-j 15 minutes bw: \$3.45 Designed to introduce basketball to beginning students in the upper elementary and junior high school grades. Using a playing situation, the elements of the game are presented simply, clearly, and in non-technical language.

BASKETBALL STRATEGY FOR GIRLS (ya)

j-h-c 10 minutes bw: \$2.15 Offensive play in basketball is given a concise explanation. It includes fakes, rolls, cutting, screening, and varying the pace. The final phase shifts to defense play, and concentrates on player to player, basic zone, shifting zone, triangle, and diagonal.

BASKETBALL TECHNIQUES FOR GIRLS (ya)

j-h-c 10 minutes bw: \$2.15

Demonstration and explanation of the following basic skills: basic movement skills (running, starting, stopping, turning), passing (finger control, movement with the pass, leading the receiver, choice of the right pass), catching (slide pass, high pass), shooting (finger control, arm extension, wrist flip, choice of the right shot), dribbling, faking, and pivoting.

BATHING THE BED PATIENT (uw)

c-a 20 minutes bw: \$2.90 The procedure for making a neat bed with minimum of disturbance to the patient is shown. The proper method of washing the patient with as much comfort as possible is also demonstrated.

BATTING FUNDAMENTALS (c)

j-h-c 10 minutes bw: \$2.15 The batter's average depends on how well he has mastered the fundamentals of selecting the right bat, using the correct grip, taking a proper stance, keeping his eye on the ball, using a level swing into the ball, and finishing with a complete followthrough. These points and the exercises by which they are mastered are brought to light by top form professionals.

BATTING STARS OF BASEBALL (anl)

i-j-h-a 18 minutes bw: \$3.15 Covers the more important fundamentals of batting in slow motion by established major league stars.

BEAT BALL (iu)

i-j 4 minutes bw: \$1.65 Shows and explains the diamond, the proper bases, and the types of balls that may be used. Pictures a simple way to divide the teams and to start a game. Shows how the batter throws and hits the ball, and also explains the rules and object of the game.

BEFORE THE BABY COMES (kb)

h-c-a 10 minutes bw: \$2.15 A guide to the expectant mother. The film shows the mother's first trip to the doctor and explains the value of an early physical examination. Correct clothes, dental care, proper foods, bathing and other practices for good health during the period of pregnancy are shown and explained.

BEGINNING SWIMMING (c)

i-j-h 10 minutes bw: \$2.25 Land and water drills — including kicking, breathing, floating, paddling, stroking and pulling with the arm — are practiced separately, then coordinated as the swimmer learns the American crawl. The back float, backstroke, and breast stroke are also explained.

BEGINNING TENNIS (aap)

j-h-c-a 14 minutes bw: \$2.55 The purpose of this film is to demonstrate and analyze the correct body movements of tennis fundamentals. The film shows actual playing situations in which these fundamentals are emphasized, and also includes individual demonstration and analysis.

BEGINNING TUMBLING (c)

j-h-c 9 minutes bw: \$2.15 Presents the two basic progressions in tumbling—the inverted balance and roll progressions. Accompanying demonstrations of flips, rolls, and stands (singly and in combination) emphasize skillful execution and give students the foundation for performing each stunt.

BETTER BASKETBALL (ihsa)

j-h-c-a 28 minutes bw: \$2.15 By showing the differences between the type of basketball played during Grandfather's day and that of today, the evolution of the game is shown, as well as a comprehensive treatment of the rules and some good sequences of plays. Such other phases of the game are shown as personal and technical fouls, officiating, and dribbling.

BETTER FOOTBALL (ihsq)

j-h-c-a 28 minutes bw: \$2.15 After the Whiz Kids, a high school football team, lose a game primarily because of penalties, the coach spends a week drilling them in the rules of the game. Describes the function of the uniform and shows how a team can lose a chance for championship because one member forgets the rules.

BIG LEAGUE BASEBALL (bfs)

general 9 minutes bw: \$2.15 This film stresses the need for teamwork and perfect coordination in baseball. Some of the outstanding stars of yesterday, including Gabby Hartnett, Dizzy Dean, Carl Hubble, and Bill Lee, are shown as they performed in their respective positions.

BIG TEN FOOTBALL HIGHLIGHTS OF 1952 (ui)

general 31 minutes bw: no charge Highlights of the Big Ten football season during 1952.

BIOGRAPHY OF THE UNBORN (eb)

h-c-a 15 minutes bw: \$3.65 Traces the creation of life from the moment of fertilization to the moment when the infant begins independent life. In photomicrography, animation, live photography, and X-rays, the film records the development of the embryo and the fetus in the mother's womb.

BIRTH OF MODERN BOXING, THE (YOU ARE THERE) (cbs)

j-h-c-a 28 minutes bw: \$5.65 The modern Marquis of Queensbury rules for boxing became a reality on September 7, 1892, in New Orleans, with the heavy-weight championship fight between Sullivan and Corbett. Fight game rules from that time until the present day were affected by this bout.

BITTER WELCOME (mhfb)

h-c-a 36 minutes bw: \$7.05 Depicts the struggle of a discharged mental hospital patient to overcome the fears and prejudices of his fellow-workers. It shows his painful efforts at readjustment when he is rejected by the men on the job. It dramatizes his courage and perseverance as he battles against odds to justify his wife's faith in him, to keep his job and to regain his own self-confidence.

BLOCKING IN FOOTBALL (eb)

j-h 10 minutes bw: \$2.15 Emphasizes importance of speed, power drive, follow-through, timing, and body control for effective blocking. Stresses correct starting position for all blocks, and then demonstrates clearly the cross-body block and the shoulder block, together with their many variations. Uses slow-motion and stop-motion photography and super-imposed animated drawings.

BLOOD TRANSFUSION (bis)

j-h-c-a 18 minutes bw: \$2.90 The story of the development of blood transfusions from the discovery of the four blood types to the modern blood doning systems developed in World War II.

BLUE DANUBE (uw)

h-c-a 10 minutes bw: \$1.65 The famous waltz, played by the Vienna Philharmonic Orchestra, serves as the background for an interpretive ballet, and the period in which the music was written.

BODY BUILDERS (spec)

j-h-c-a 18 minutes bw: \$2.15 Shows some of this country's finest masculine physiques. Illustrates the basic exercises, and gives an audience, unfamiliar with body building, an idea of how much perfection can be achieved by weightlifting, tumbling, and hand-balancing. Renald and Ruby appear in a sequence. Intended to encourage and stimulate body building and the sport of weightlifting.

BODY CARE AND GROOMING (mcgh)

j-h-c 17 minutes bw: \$3.90 Emphasizes that good grooming starts with personal care, and describes some recommended daily habits that help everyone to make the most of what nature has provided. Demonstrates how to take care of skin, hair, nails and teeth and stresses the social advantages of a clean, healthy appearance.

BODY DEFENSES AGAINST DISEASE (eb)

j-h-c-a 10 minutes bw: \$2.15 Examines the three lines of defense against infection — the skin and mucous membrane, the lymphatic system, and the circulatory system, including liver and spleen. Explains how the body becomes immune to certain diseases, and how to improve defenses against infection.

BODY FIGHTS BACTERIA, THE (mcgh)

j-h-c-a 17 minutes bw: \$2.95 The story of the never-ending battle between disease-producing organisms and the human body. Various types of these organisms such as bacilli, cocci, and spirochetes are shown to be plentiful and dangerous. The film then describes the various counterbalances which mankind uses in combating these bacterial invaders.

BORN IN THE WHITE HOUSE (nfi)

h-c-a 26 minutes bw: \$1.15 Traces the progress of medical science in the conquest of disease, with particular emphasis on recent gains in polio research and treatment of the disease.

BOWLING ACES (UW)

j-h-c-a 10 minutes bw: \$1.70 A revised edition of a popular bowling film featuring the great Joe Falcaro and other bowling champions.

BOWLING FUNDAMENTALS (m)

h-c-a 17 minutes bw: \$3.90 Initial techniques of bowling are presented by an expert who provides instruction and demonstration to a group of boys and girls. Each important point is covered, step-bystep, and a lesson is given in selection of ball, stance, approach, aim, delivery, follow-through, and direction.

BOWS AND ARROWS (of)

j-h-a 10 minutes bw: \$2.10 A thrilling outdoor adventure with bow and arrow. An archery game called "roving" is demonstrated. Special tricks are performed by five-time champion Russ Hoogerhyde.

BOY, A BAT AND A BASEBALL (ya)

i-j-h 17 minutes bw: \$3.45 The story of amateur baseball for boys from 8 to 18. Shows examples from Little League Baseball, the Babe Ruth League, and American Legion Baseball.

BRAIN AND BEHAVIOR (mcgh)*

c-a 22 minutes bw: \$4.75 Demonstrates two ways by which we can study the function of different brain areas in human behavior: the method of artificially stimulating different parts of the brain with an electrode and observing the results: and the method of measuring, by means of tests, the changes in behavior following injuries in different areas of the brain.

BREAKDOWN (mcgh)

c-a 44 minutes bw: \$6.65 A vivid and completely authentic case study of a young woman who develops a schizoid personality. Through the camera's eye we follow the course of her treatment — first in a mental health clinic and later in a state hospital. Finally we see her discharged from this institution to complete her rehabilitation as a member of her family.

BREAST SELF-EXAMINATION (acs)

a 16 minutes color: \$2.15 Explains the steps to follow in breast examination. The film stresses that if breast cancer were suspected earlier by women themselves, 80% of the patients could be saved by surgery. This film should be accompanied by a discussion period with a doctor on hand to answer all questions. Primarily for women's clubs, parent-teacher associations, social organizations and church societies.

BROAD JUMP (c)

j-h 9 minutes bw: \$2.15 Pointers on how to add inches to the jump by proper exercise and how to handle the body during the jump are stressed. The film also covers the hop, step, and jump. Precautions to prevent injury to the athlete in this strenuous event are emphasized throughout the film.

BROTHERS IN BLOOD (tfc)

j-h-c-a 11 minutes bw: \$1.65 Carey Wilson goes to a Red Cross Blood Bank to donate his pint of blood. The doctor, an old friend, tells him the story of the origin and development of scientific research that made possible the saving of human lives by blood transfusions as scientists discovered the properties and different types of blood. Restricted to classroom use.

BUILDING CHILDREN'S PERSONALITIES WITH CREATIVE DANCE (uc)

general 30 minutes color: \$9.40 In teaching dancing to a group of children, the teacher skillfully guides and praises each child toward a unique personal and improvised style, leading them from the point when they are embarrassed and tense to their eventual demonstration of creative expression.

CANADA DANCES (nfbc)

general 9 minutes bw: \$1.65 Traditional and present-day dances are seen as the response of group and individual to environmental pressures. The influence of social conditions on dance forms is demonstrated in a survey which ranges from Indian religious dances, through the national and folk dances of pioneers and early settlers, the square dances of rural communities, to the mechanistic individualism of modern jive.

CANCER (eb)

j-h-c-a 12 minutes color: \$3.40 A timely film explaining the basic facts that everyone should know about cancer. Describes the nature of cancer, the widespread necessity for constant vigilance in the detection and subsequent treatment of cancer.

CANCER: A RESEARCH STORY (acs)

j-h-c-a 31 minutes color: \$2.15 An exceptionally interesting film showing the history of cancer research. One of the main problems in this field has been whether or not cancer is inherited. By long and continuous experiments in the field of genetics the answer has finally been found.

CARE OF HAIR AND NAILS (eb)

p-i-j 11 minutes bw: \$2.15 A fairy tale character shows youngsters how to clean and manicure fingernails, how to trim toenails, and how to shampoo and brush the hair. She lets them see some common diseases of the scalp and uses animated drawings to show the structure of hair and nails, and to explain why their

CARE OF THE FEET, THE (eb)

care is important.

j-h 11 minutes bw: \$2.15 Emphasizes the extreme importance of good foot care, and points out the tragic results of ill-fitting shoes. Diagrams shown on the bones and muscles of the feet serve to simplify and make plain the reasons why great care should be used in selecting good shoes and in exercising the feet to make them strong.

CARE OF THE SKIN (eb)

p-i-j 11 minutes bw: \$2.15 Demonstrates the good habits of skin hygiene which every child should form. Portrays three attractive children as they prepare for bed, showing the proper way to wash hands and face, to clean the nails, and to bathe. Common skin ailments are illustrated. Animated drawings describe the structure of the skin and explain why soap is necessary for cleanliness.

CAREERS IN RECREATION (ai)

h-c-a 25 minutes color: \$7.40 Depicts some of the duties of recreational leaders in various social areas such as civilan, military, hospital and industrial communities. Explains the unlimited opportunities of making recreation a career for young men and women.

CATCHING FUNDAMENTALS (c)

j-h-c 10 minutes bw: \$2.15 Here's big leaguer Mike Tresh to demonstrate good catching. He shows such fundamentals as how to crouch and signal, how to throw the ball, how to catch the pitch, field fouls, back up first base, etc. He demonstrates the skill and strategy that can make a catcher the team's most valuable player.

CATCHING IN BASEBALL (eb)

j-h 9 minutes bw: \$2.15 Professional baseball players demonstrate effective techniques for catching the thrown ball, the high-batted ball, and the ground ball. Slow-motion, stop-motion, and close-up photography make possible a careful study of each of the techniques demonstrated. Emphasizes the need for constant practice.

CELLS AND THEIR FUNCTIONS (ath)

j-h-c 14 minutes bw: \$2.70 The activities of a number of kinds of cells are illustrated including mitosis or cell division, beating cilia, blood cells engulfing bacteria, and the proliferation and growth of cardiac and other tissue. Includes techniques and examples of tissue culture.

CHALLENGE: SCIENCE AGAINST CANCER (ifb)

h-c-a 33 minutes bw: \$5.65 Shows the research now being carried on to discover the cause, development and cure for cancer. A secondary purpose of the film is the recruitment of high school and college students into scientific work.

CHAMPIONSHIP BASKETBALL (of)

j-h-c-a 9 minutes bw: \$1.70 Plays by the nation's outstanding teams. Analyzed by Nat Holman, head basketball coach at the College of the City of New York. Emphasizes the value of teamwork. The man-to-man defense and its variations are shown with the means best used under varying situations to counteract them. Other fundamentals, including passes, receiving, and pivot plays are sketched.

CHAMPIONSHIP FORM (sf)

j-h-a 9 minutes bw: \$1.65 The film takes several phases of Olympic competition and compares them so far as body movement and form are concerned. It shows that perfect body coordination and grace of movement are essential to championship athletic standards. Great Olympic stars are shown in action.

CHANNEL BASS AND STRIPERS (sf)

j-h-c-a 11 minutes bw: \$2.25 Champion surf-casters fight champions of the surf off Montauk Point and Cape Hatteras.

CHECKING FOR INJURIES (arc)

h-c-a 19 minutes bw: \$2.50 A helpful guide in first aid training programs. This film presents an analysis of how to examine and protect an injured person.

CHIROPRACTIC STORY (ichs)

j-c-a 22 minutes color: \$2.15 Description of training for a career as a chiropractor.

CHOICE IS YOURS, THE (wctu)

j-h-c-a 23 minutes color: \$4.65 Dr. A. C. Ivy, University of Illinois professor, and young people question a science teacher about the effects of alcohol.

CHOOSING A DOCTOR (mcgh)

h-c-a 16 minutes bw: \$3.65 When Fred's eight-year-old daughter Cathy has what seems to be an attack of appendicitis, he and his wife, newcomers to town, realize they have done nothing about selecting a doctor. Fred is forced to rely upon a doctor he met for just a few minutes while playing golf. His decision is justified by a successful operation on Cathy, but not before Fred learns the importance of knowing a doctor's qualifications and standing, and how he can obtain such reliable information.

CIRCLING THE BASES (anl)

j-h-c-a 20 minutes bw: \$3.00 The basic fundamentals of base running are shown. George Sitrnweiss, George Case, and George Myatt are depicted in scenes from actual baseball games.

CIRCULATION (uw)

j-h-c-a 18 minutes color: \$5.65 Animated diagrams of the human body describe the systematic and pulmonary circulation of the blood. The structure and functions of heart, lungs, arteries, veins, and capillaries are also described. Shows the route of the blood through the body, the heart cycle, and the exchange of oxygen and carbon dioxide in the lungs and cells of the body.

CIRCULATION: WHY AND HOW (cw)

j-h 10 minutes color: \$3.60 Explains the needs of the body's cells and how some of these needs are serviced by the circulation system. It details how blood returns from the capillaries to the heart through the venous system, how the chambers of the heart pump the blood through the pulmonary system then back through the arterial system to the capillaries.

CITY OF THE SICK (nmh)

h-c-a 18 minutes bw: \$2.85 Mental patients can be restored to a useful living. A mental hospital attendant is seen as he serves the patients; little things noted by the attendant often sparks the patient on the road back to recovery.

CLARK SHAUGHNESSY "T" (avf)

h-c-a 30 minutes bw: \$5.15 Members of the 1941 unbeaten and untied Stanford team go through the paces of the "T" that brought them fame.

CLEAN WATERS (ge)

j-h-c-a 24 minutes color: \$7.65 Preventing the pollution of our water supply is a problem of vital interest to all citizens. This film deals with the commercial necessities for pure water, and presents the dangers to health and life resulting from pollution of public water systems. Animated diagrams illustrate preventive measures.

CLIENT-CENTERED THERAPY (psc)

c-a 60 minutes bw: \$11.15 Part I: The client is a female graduate student superior in scholastic achievement but perturbed about her social isolation. Covers the initial interview.

Part II: Shows the 32nd session in the case of a middle-aged mother who is experiencing a certain amount of conflict with her husband and daughter. Recommended for professional use only.

CO-ED SPORTS (rko)

h-c-a 7 minutes bw: \$2.65 Women perform a variety of sports at Stanford University. They are active in archery, fencing, swimming, golf, and modern dance.

COLOR OF HEALTH (aba)

j-h 11 minutes color: \$2.15 Explains the value of physical education and stresses the importance of good eating habits in physical and mental well being.

COMMON COLD, THE (eb)

p-i-j 10 minutes bw: \$2.15 Illustrates the facts known about the common cold, its care, and secondary infections that may grow out of it. Tells the story of a boy who contracts a cold and visits his doctor for examination and advice. Reveals, by means of the doctor's illustrated explanation, why the common cold is serious and how it should be taken care of.

COMMON HEART DISORDERS AND THEIR CAUSES (mcgh)

c-a 17 minutes bw: \$3.90 First reviews the functioning of a healthy heart and circulatory system. Then studies common heart disorders, giving the history, symptoms and effects of childhood rheumatic fever, the assumed causes of hypertension, and the effects of each of the conditions which may be caused by arteriosclerosis.

COMMUNITY HEALTH AND YOU (mcgh)

j-h 11 minutes bw: \$2.35 This film is designed to acquaint the viewer

with the vital services of local community health services, and the necessity for the cooperation of all citizens with these services. The protection of water and food supplies and proper sanitation measures to guard against pollution by waste materials are among the many services which are performed by these agencies and discussed in the film.

COMMUNITY KEEPS HEALTHY, A (fa)*

10 minutes color: \$3.60 Discusses what is necessary in order to make a community a healthy place. Shows the community health department inspectors who visit dairies to test milk and visit produce markets, the city workers who clean the streets, and the water department workers who keep the water pure. Shows that community health depends upon the united efforts of all.

COMMUNITY MENTAL HEALTH (mhfb)

30 minutes bw: \$6.15 How a community, once it sees the need for mental health facilities, can work together to achieve a broad mental health program. Through the use of an interesting example, we see how the community and the governmental agency together can provide an effective mental health service.

CONFESSIONS OF A COLD (nmp)

10 minutes bw: \$2.15 A "cold sprite" reveals to a young lady the seriousness of colds, the loss they cause, how colds spread, and methods of treatment. Animation and live photography are combined.

CONSUMPTION OF FOODS (eb)

bw: \$2.15 h-c 10 minutes Presents basic food needs and regional deficiencies of various peoples of the world. Defines minimum standards of food consumption in terms of energy requirements and a balanced diet. Suggests methods to bring food consumption to adequate levels by increasing land productivity, raising individual purchasing power and solving distribution problems.

CONTEMPORARY DANCE (silent) (pma)

30 minutes color: \$5.15 Reel I: American dancers and choreographers including Louis Horst, Doris Humphrey, Charles Weidman, Hanya Holm, Jose Limon, Harriette Anne Gray and Perry-Mansfield students.

Reel II: Young American dancers including Robin Gregory, Allegra Fuller, Harriette Anne Gray, Eleanor King, Iris Mabry, Valerie Bettis and students.

CONTROL OF BODY TEMPERATURE (eb)

11 minutes bw: \$2.15 By means of laboratory demonstrations, animated drawings and special photography, phenomena associated with variations of body temperature in animals and man are shown. Foods are designated as the source of body heat and the roles of nerves, glands and muscles in its control are portrayed. The blood stream is depicted as the distributor of heat, and the function of the hypothalamus is compared to that of a thermostat.

DANCE DEMONSTRATION (pma)

11 minutes color: \$3.30 In the first part the group demonstrates techniques to develop flexibility, flowing movement and elevation. In the second part ways are shown to stimulate the imagination to develop dramatic character and to find fresh ways of moving.

DANCE FESTIVAL (brf)

11 minutes bw: \$2.15 The successful contestants at the International Dance Festival in London are featured in the dances of the Ukraine, Caucasus, Uzbekistan, and Armenia.

DANCER'S WORLD (rem)

j-h-c-a 31 minutes bw: \$6.65 Martha Graham discusses the dancer as a creative artist, explaining the craft simply and clearly while members of the company execute a dance to illustrate her theories. Excerpts are given from the company repertoire.

DANGEROUS STRANGER (sd)

11 minutes bw: \$2.15 Should be shown to all elementary school children. Impresses the child with the need to be on guard against molesters, and not to become friendly with strangers. The dangers of listening to the "dangerous stranger" are explained, and places and circumstances under which the child may encounter "dangerous strangers" are dramatized.

DAREDEVILS ON ICE (uw)

i-i-h-c-a9 minutes bw: \$2.25 Winter sports and thrill-hunters are featured here in exciting action. Ski races, ice boating, auto races, bobsled racers risking lives for speed are all included in this thrilling movie.

DASHES, HURDLES, AND RELAYS (eb)

bw: \$4.15 j-h 18 minutes Demonstrates accepted methods of starting, sprinting, hurdling, and baton passing. Analyzes in detail the 100, 200, and 400 meter dashes. Illustrates varying forms in the high hurdles, 200 meter low hurdles, and 400 meter hurdles.

DAY OF THE FIGHT (mcgh)

bw: \$3.85 j-h-c-a 18 minutes Follows the activities of Walter Cartier, middleweight boxer, on the day of a fight.

DEAFNESS IN CHILDREN (THE SEARCH) (cbs)

27 minutes bw: \$5.65 Shows the research done at Johns Hopkins University on the diagnosis and cure of deafness in children. Based on the theory that there is rarely a total loss of hearing, the research illustrates how children with hearing difficulties can still lead full and useful lives, if they receive early diagnosis and immediate treatment and training.

DEATH IN THE ARENA (sf)

10 minutes bw: \$2.25 Bull-fighting scenes in which the matador, Manolete, loses his life.

DEDICATED, THE (vi)

24 minutes color: no charge h-c-a Insight into professional education for the health sciences of medicine, dentistry, pharmacy and nursing. It takes the viewer into surgery, experimental laboratories, classrooms and clinics. We see students working with doctors and patients in the University of Illinois' research hospitals. It acquaints viewers with the fascinating and vital education of men and women dedicating their lives to the health and happiness of others.

DEFENSE AGAINST INVASION (wdp)

general 12 minutes color: \$3.00 Explains in simple fashion through animation and actual photography how vaccination makes the body immune to disease.

DEFENSIVE FOOTWORK IN BASKETBALL (eb)

bw: \$2.15 j-h 9 minutes Analyzes the two basic defense moves: 1) the parallel movement, which governs lateral guarding motions, and 2) the strike, which governs advancing and retreating motions. Emphasis is placed on correlation of arm movement with footwork, turning, pivoting, and getting into position for taking the ball on the rebound.

DEMOCRACY OF BASEBALL (anl)

19 minutes bw: \$2.15 History of baseball featuring some of the past and present stars of professional baseball including Connie Mack, John McGraw, Babe Ruth, Ty Cobb, and Tris Speaker.

THE DENTAL ASSISTANT - A CAREER OF SERVICE (hew)

color: \$2.15 13 minutes This film introduces us to the dental assistant and the preparation for a career in the field. Not only must the dental assistant be familiar with the technical aspects of the dentist's work, but she must be able to manage the dentist's office and act as a secretary and receptionist for the office. Training includes personal make-up and hair styling.

DENTAL HEALTH: HOW AND WHY (c)

bw: \$2.15 10 minutes color: \$3.40 Presents a dramatic review of what research and experiments have done to promote better dental health for the American public. Brings you an up-to-date report on diet and its relation to the growth and decay of teeth, new sodium fluoride applications, and the latest techniques of oral hygiene. The coveted Seal of Approval of the American Dental Association has been awarded to this film.

DESIGN FOR PHYSICAL EDUCATION IN THE ELEMENTARY SCHOOL (wu)

20 minutes bw: \$4.85 Shows a physical education specialist and a teacher working together to solve some of the first emotional and social problems in the 9 and 10 year age group.

DIARY OF A SERGEANT (uw)

h-c-a

bw: \$2.15 22 minutes Traces the treatment of an amputee in an army hospital and his rehabilitation, including his skillful manipulation of artificial arms and hands.

DIGESTION: PART I (uw)

18 minutes bw: \$3.65 i-h-c-a Study of the mechanical and muscular processes involved in the digestion of food. Animated diagrams are used to emphasize and clarify the detail of each process.

DIGESTION: PART II (uw)

i-h-c-a 19 minutes bw: \$3.85 Shows chemical changes involved in the digestion of the three main types of foods carbohydrates, proteins, and fats.

DIGESTION OF FOODS (eb)

10 minutes bw: \$2.15 A summary of the digestive process including the work performed in mouth, stomach, and small intestine. Illustrates mechanical aspects such as mastication, swallowing, stomach contractions, intestinal segmentation, and intestinal peristalsis, and depicts chemical reactions of various digestive juices. Animation shows absorption of digestive products into the blood.

DIGESTION IN OUR BODIES (c)*

i-j 11 minutes color: \$3.60 The steps in the digestive process are traced and functions of main organs explained. We are shown how and why food must be digested before the body can use it, and why correct eating attitudes and habits are important. X-ray techniques and simplified diagrams help explain digestion.

DISCOVERY OF ANESTHESIA, THE (YOU ARE THERE) (cbs)

j-h-c-a 27 minutes bw: \$5.65 A memorable date in medical history is that of October 16, 1846, when Dr. Morton's new pain-suppressor (ether) was used successfully in a surgical operation in Boston.

DISCUS, THE (uw)

j-h-c 10 minutes bw: \$2.15 In stressing fundamentals, condition, and form, this film demonstrates principle of centrifugal force, muscle development for side arm throw, grips, finger roll, heel and thumb pressure, finger exercises, clockwise spin, and hip snap.

DISCUS (TRACK AND FIELD INSTRUCTION SERIES) (rf)

j-h-c 13½ minutes bw: \$2.60 Shows principles of the discus throw. The technique is shown through the analysis of championship-type throws. With the aid of slow motion, the essential points of form are made vivid. In the film we work with an inexperienced candidate and put him through the drills needed to acquire good form.

DISCUSSION PROBLEMS: WHAT ABOUT ALCOHOLISM (mcgh)

j-h-c 11 minutes bw: \$2.15 Presents different approaches to alcoholism. Follows a high school class as they investigate law and medicine and interview individuals in order to obtain their views on alcoholism. This film is designed to stimulate discussion of the nature, cause, and treatment of this social ill.

DISCUSSION PROBLEMS: WHAT ABOUT DRINKING (mcgh)

j-h-c 11 minutes bw: \$2.15 A dramatic situation in which the report of an accident precipitates a discussion by a group of teen-agers on attitudes toward use of alcoholic beverages. Designed to provoke group discussion of individual and group attitudes on the topic.

DISTANCE RACES (eb)

j-h 8 minutes bw: \$2.15 Permits careful study of form and style in the 800 meter, 1500 meter, and 5000 meter races, and in the 3000 meter steeplechase. Contrasts style of the distance runner with that of the dash man. Emphasizes correct techniques in the start, the finishing spurt. Utilizes slow-motion photography.

DIVING FUNDAMENTALS (of)

j-h-c-a 11 minutes bw: \$1.65 Brief history of the sport of diving with various diving fundamentals explained and demonstrated. Instructor is Fred Cady, University of California, who has coached American Olympic teams.

DR. PINEL UNCHAINS THE INSANE (YOU ARE THERE) (cbs)

j-h-c-a 27 minutes bw: \$5.65 In 1793, Dr. Pinel fights for humane treatment of the mentally ill, heretofore treated as incurable criminals. His success in a Paris hospital for the insane was a milestone in the medical annals.

DOLPHIN KICK, THE (c)

i-j-h 8 minutes bw: \$2.00 With the use of an underwater camera, we see an amazing demonstration of this new swimming technique. An analysis of the body movements used in this stroke is explained by an excellent swimmer as he shows the dolphin kick in actual use. The film stresses the importance of practice in order to master the kick.

DRUG ADDICTION (eb)

j-h-a 22 minutes bw: \$3.85 The story of a youthful addict emphasizes the hazards of the use of narcotic drugs. Shows the derivation of various drugs, the causes and physiological effects of drug addiction, and the treatment for those who are addicted.

DYNAMIC POSTURE (FOUR PARTS) (aacc)

h-c-a 9 minutes each color: \$2.15 each This film shows the dynamic postures of the body in motion or in action, and points out the direct relation of posture to comfort, mechanical efficiency and physiological functioning. The film was prepared primarily for orthopedic physicians, nurses, physical

therapists and physical education teachers. It is also suitable for persons in related fields as well as for students.

EARS AND HEARING, THE (eb)

j-h-c 9 minutes bw: \$2.15 Describes the physiology of the human ear by means of animated drawings and close-up photography of the ear as it is functioning. Portrays how parts of the ear operate, and records some of the important kinds of sounds in our environment. Explains common causes of impaired hearing and demonstrates how a hearing aid is used.

EDUCATION IN SPORTS, AN (vi)

j-h-c 17 minutes bw: no charge Men students enrolling in physical education classes at the University of Illinois will be able to choose from 32 different courses. These courses are broken down into six major areas: 1) Therapeutic, 2) Aquatic, 3) Athletics and Acrobatics, 4) Combatives, 5) Team Sports, and 6) Recreational Sports. Scenes of representative sports in each area are shown.

EDUCATION OF EXCEPTIONAL CHILDREN (ui)

c-a 20 minutes bw: \$3.25 Depicts all phases of a well-rounded, nationally recognized program for the education of exceptional and handicapped children, including the blind, deaf, crippled, speech impaired, and mentally retarded ones. Emphasis on guidance of the child toward physical therapy and recreational pursuits.

ELEMENTARY TACTICS OF LIFESAVING (caa)

j-h-c-a 20 minutes bw: \$2.15 This film shows how to gain control of the victim by surface and underwater approaches, breaks, and carries. Slow motion land drills and demonstrations in the water are presented.

ELEMENTARY TECHNIQUES OF FIELD HOCKEY (2 PARTS) (silent) (ustfh)

j-h-c 30 minutes color: \$5.15 Shows elementary strokes and teaching methods in field hockey.

ELIMINATION (uw)

j-h-c-a 12 minutes bw: \$2.65 A study of the human body's methods of elimination. The structure and functions of the four routes of elimination are described in detail—skin, kidneys, lungs, and colon.

EMOTIONAL HEALTH (mcgh)

c 20 minutes bw: \$4.15 This film has three primary objectives: (1) to convince young people of college age that emotional upsets are common, (2) to show that if a disturbance of this kind is prolonged, the need for professional counsel and care is just as important and normal as with any physical illness, and (3) to explain in simplified language some of the basic techniques of psychiatric treatment and thereby allay some of the stigma attached to the necessity for this treatment.

ENDOCRINE GLANDS (eb)

j-h-c 10 minutes bw: \$2.15 Demonstrates the importance of various glands of internal secretion. By means of diagrammatic drawings and experiments on a goat, the film points out the effects of improper functioning of the glands and the causes and remedies of faulty glandular actions.

ENDOCRINE GLANDS: HOW THEY AFFECT YOU (mcgh)

h-c-a 18 minutes bw: \$4.00 Animation shows the location of endocrine glands in the human body and explains how hormones secreted by these glands affect growth, metabolism, sexual development, and behavior. Discusses the use of animal hormones in the treatment of human diseases.

ESCAPE IN CANADA (uw)

i-j-h-c-a 10 minutes bw: \$1.70 Shows vast Canadian wilderness areas which provide campers and sportsmen with an escape from modern civilization.

ESSENTIALS OF FIRST AID (uw)

j-h-c-a 30 minutes bw: \$3.65 Describes some of the medical facilities afloat, methods of transporting and protecting injured men, rescuing and reviving men overcome by smoke, contents of Navy first aid kits, and steps in the examination and treatment of the wounded.

ETHER FOR ANESTHESIA (mcc)

j-h-c-a 20 minutes bw: \$2.15 Ether today is rigidly tested for stability and strength, in marked contrast to the days when ether was first manufactured for use in surgical operations. Shows the history of distillation of ether as well as the manufacturing process.

EXERCISE AND HEALTH (c)

j-h 10 minutes bw: \$2.15 There is much more to exercising than just building muscles. Ernie was in a run-down condition and sick too often. Jean slouched through life, was awkward and too shy. Hal was "all work and no play," and much too irritable. Yet exercise and participation in athletics helped each of them to overcome a particular difficulty. The film shows that the right kind of exercises will go a long way toward making them healthier, happier, and more apt to succeed in any undertaking.

EXPLORING WITH X-RAYS (ge)

j-h-a 36 minutes bw: \$2.15 Made for the information and education of the general public, this film is designed to offer to the layman an idea of the scope of the use of X-rays and to inform him in an entertaining manner of its potentialities. The film is not regarded as a demonstration of X-ray procedures in their entirety nor as depicting in detail complete modern radiographic technique. Produced with the cooperation and approval of the American College of Radiology.

EYES AND THEIR CARE (eb)

j-h-c 11 minutes bw: \$2.15 The physiology and hygiene of the eye are treated in detail. Animated drawings clarify structure and function. The film explains eye movements, learning to judge distance, light receptors, field of vision, night blindness, double vision, near and far-sightedness, infections, and protection of the eyes.

EYES FOR TOMORROW (nspb)

j-h-c-a 20 minutes bw: \$3.15 Stresses relationship of good general health to good eye health. Tells the importance of prenatal care as a means of reducing incidence of blindness due to venereal diseases; care of babies' eyes at birth; use of special educational facilities for partially seeing children; the necessity for regular eye examinations; importance of good lighting and safe working practices in schools and industry. Outlines symptoms, development, detection and treatment of glaucoma.

EYES: THEIR STRUCTURE AND CARE (c) bw: \$2.25

j-h 11 minutes color: \$3.40 Ed's headaches, failing grades, and poor distance judgment lead to a discussion of common symptoms of eye trouble. Animation demonstrates the functioning of the eye and its structure. Common defects and their corrections are shown and the professions of the ophthalmologist, optometrist, and optician are explained.

FAIR CHANCE (ntb)

c-a 14½ minutes color: \$3.50 A dramatization points out the need for

Planned Parenthood and the help available at Planned Parenthood clinics. A new father tells the story by utilizing a flashback of his own childhood, the problems faced by his family because of too many children, and the help found through Planned Parenthood.

FAITH, HOPE AND HOGAN (ch)

j-h-c-a 28 minutes bw: \$3.75 A highly inspirational film, based on the come-back of champion golfer, Ben Hogan. The film shows that personal responsibility is an important factor in over-coming handicaps.

FIGHT GAME, THE (mcgh)

j-h-c-a 17 minutes bw: \$3.40 Starting from the days when the rules of boxing were first formalized, this film gives glimpses of such past heroes as Gans, Nelson, Dempsey, Tunney, and Louis at the height of their greatness. Also emphasized is the use of boxing by groups working with boys to give them healthful recreation and to channel their energies away from socially destructive practices.

FIRST AID: FUNDAMENTALS (c)

i-j 11 minutes color: \$3.40 An introduction to first aid: covers skin wounds, burns, sprains and bruises and presents an introductory demonstration of the back-pressure arm-lift method of artificial respiration.

bw: \$2.15

FIRST AID ON THE SPOT (3RD EDITION) (eb)

j-h 10 minutes bw: \$2.35 Features six common types of injuries or disabilities and the approved American Red Cross technique for handling each: caring for wounds, burns, and shock; of splinting, controlling bleeding, and administering artificial respiration.

FIRST MAJOR TEST OF PENICILLIN (YOU ARE THERE) (cbs)

j-h-c-a 27 minutes bw: \$5.65 An example of the scientific development in modern medicine and the influence it makes in war and peace is dramatized by the discovery of a yellow-brown powder. Its subsequent use creates new hope for millions.

FIRST STEPS (unfd)

j-h-c-a 10 minutes bw: \$2.15 A child crippled by paralysis can become a normal citizen, useful to himself and to society through proper training. Training and practice in the handling of toys can be transferred into the handling of tools and utensils. This film was taken in a summer camp for

crippled children and as it ends, a little boy leaves his parents to take his first unaided steps on a crowded city street.

FISHING FUN (uw)

j-h-c-a 8 minutes bw: \$1.70 Scenes of fishing including underwater shots of bass stalking and striking a fisherman's artificial bait.

FISHING THRILLS (uw)

j-h-a 8 minutes bw: \$1.65 You don't wait for a bite, a thrill, or a fish in this exciting film. The camera goes where the gamesters hungrily eye the bait and strike with a flash of silver scales. You hold fast to a bending rod, you give a fighting fish more line, you meet his vicious rushes, you strain to reel him in, you win the battle.

FLYING TARGETS (of)

j-h-c-a 10 minutes bw: \$2.25 The hunting of duck in the scenic marshland of the Tidewater section of Virginia is shown.

FOOD THAT BUILDS GOOD HEALTH (c)

i-j-h 9 minutes bw: \$2.15 color: \$3.40 Stresses the relationship of good health to the foods we eat and what those foods are. Irritability, lack of energy and physical weakness are some of the results of a poor, unbalanced diet. How eating the right foods regularly, in the right amounts, contributes to building strong, healthy bodies is shown.

FOODS AND NUTRITION (eb)

j-h-c 11 minutes bw: \$2.15 Develops a general understanding of proper principles of nutrition. Analyzes normal dietary requirements of carbohydrates, fats, proteins, minerals, vitamins, and water. Animated drawings depict absorption and transformation of sugars, carbohydrates, fats, and proteins, and explains the method of determining basal metabolism rate. Laboratory experiments show results of deficiencies in minerals and vitamins.

FOOTBALL FOR MILLIONS (ihsa)

j-h-c-a 30 minutes bw: \$2.15 An amateur chooses Football Rules as his quiz show category. His experience with official interpretations proves interesting, humorous and embarrassing when asked to be the sole judge of the rules on intricate football play situations.

FOOTBALL FUNDAMENTALS: BLOCKING AND TACKLING (c)

h-c 10 minutes bw: \$2.15 Shows defensive and offensive techniques after an introduction by Tug Wilson who stresses the importance of good blocking and tackling.

FOOTBALL KICKING TECHNIQUES (ath)

h-c 20 minutes bw: \$3.90 Ken Strong illustrates the fine points of punting, place kicking, and other details important to good kicking in football.

FOOTBALL PARADE OF 1945 (uw)

general 10 minutes bw: \$2.15 Film highlights of Army-Navy, Columbia-Yale, Georgia Tech-Tulane, Notre Dame-Illinois, Washington-So. California, Navy-Notre Dame, Michigan-Ohio State, Indiana-Purdue, and Purdue-Ohio State.

FOOTBALL PARADE OF 1949 (uw)

general 9 minutes bw: \$2.15 Highlights of the season's outstanding games.

FOOTBALL THRILLS OF 1943 (ics)

general 11 minutes bw: \$2.15 The best moments from the big games of the '43 season are shown in this sports review.

FRAUD FIGHTERS (mcgh)

j-h-c-a 17 minutes bw: \$3.40 Shows the work of the U.S. Food and Drug Administration in maintaining a constant watch over all medicines, foods, cosmetics, and other items sold interstate to make certain that the products are not harmful and conform with the manufacturer's claims.

FROM GENERATION TO GENERATION (mcgh)*

c-a 30 minutes color: \$8.40 Illustrates the basic facts of human reproduction, showing childbirth as an emotional and spiritual experience as well as a physical one. This film presents the story of reproduction as the case history of a young farm couple. One theme in the film is the lesson that human reproduction is an integral part of the universal pattern of nature. By means of animation, the film also explains the creation and development of the new life.

FROM ONE CELL (acs)

h-c-a 14 minutes color: \$3.65 This cell study considers embryonic, regenerative, and degenerative cell behavior. Beginning with the fertilized egg-cell and proceeding through the various life stages from infancy to old-age, diagrammatic and liveaction sequences review the phenomena of generative growth. The film then moves on to regenerative growth in the repair and replacement of bodily tissues. Finally, the abnormal growth of cancer is presented.

FUNCTIONS OF THE BODY (uw)

j-h 16 minutes bw: \$3.00 Demonstrates the interdependence of body systems — skeletal, muscular, vascular, respiratory, excretory, endocrinous, and nervous. Shows how their collaboration in the body makes it a smoothly-functioning unit.

FUNCTIONS OF THE NERVOUS SYSTEM (kb)

h-c-a 11 minutes bw: \$2.15 Illustrates and describes the nervous system and its functions. Emphasis is placed on its regulation of all healthy bodily functions.

FUNDAMENTALS OF BADMINTON (aap)

j-h-c 12 minutes bw: \$2.35 This film covers the basic fundamentals of badminton—the grip, forehand and backhand drop shot, smash, drive, round the head shot and footwork. These basic fundamentals are demonstrated by left and right handed players and shown in regular speed and slow motion. Some of the outstanding players in the United States demonstrated the fundamentals.

FUNDAMENTALS OF BOXING (Ifi)

j-h-c-a 10 minutes bw: \$1.65 Carl Seibert, veteran boxing instructor, and his students demonstrate every move, offensive and defensive.

FUNDAMENTALS OF CREATIVE SWIMMING: PART I — STROKES AND STROKING SKILLS (cn)

j-h-c-a 12 minutes bw: \$2.55 Creative swimming is an art form and requires flawless mastery of certain skills. Analyzes and develops the water wheel, front crawl, back crawl, side stroke, and spinning top.

FUNDAMENTALS OF CREATIVE SWIMMING: PART II --- BODY POSITIONS AND FIGURES (cn)

j-h-c-a 16 minutes bw: \$3.45 The principle of sculling is studied as a method of propulsion basic to creative swimming. Body positions studied are the back layout, front layout and side layout. Film then illustrates a variety of body figures.

FUNDAMENTALS OF DIET (eb)

j-h-c 11 minutes bw: \$2.15 Describes the basic types of food needed in daily diet. Shows man's sources of food and discloses the interchange of energy among plants, animals, and man. Demonstrates the relationship of food to body growth and maintenance through examples of controlled experiments.

FUNDAMENTALS OF DIVING (uw)

j-h-c 11 minutes color: \$3.80 Demonstrates the first simple exercises for learning water entry and body control; practice bouncing and familiarization with 1-meter springboard.

FUNDAMENTALS OF FIRST AID (BOYS) (uw)

j-h-a 18 minutes color: \$4.65 Shows the five main parts of personal damage control; fundamentals of first aid; wounds; bomb blast and burns; fractures, and artificial respiration.

FUNDAMENTALS OF SWIMMING (arc)

j-h-c-a 31 minutes bw: \$3.80 Tips and hints advise the beginning swimmer on the fundamentals of swimming. Particularly useful for those who are enrolled in the Red Cross intermediate program.

FUNDAMENTALS OF TENNIS (bfs)

j-h-c-a 20 minutes bw: \$3.40 Donald Budge demonstrates basic points. Simple forehand, back hand and service strokes, as well as more advanced strokes are analyzed, and helpful suggestions for their proper execution are clearly demonstrated.

FUNDAMENTALS OF TRACK AND FIELD (eb)

j-h 25 minutes bw: \$5.15 Shows Bob Mathias, 1952 decathlon champion, in training. He demonstrates starts in running, techniques in broad jumping, ways to hold the shot, techniques in high jumping, discus throwing, pole vaulting, and hurdling.

GAME OF JAI ALAI (tfc)

general 9 minutes bw: \$1.50 Shows the beginnings and development of the great Mexican game that is rapidly gaining popularity all over the world. Relates this fast moving, exciting game to the game of handball, and then shows some exciting scenes in the Fronton Mexico—the arena in Mexico City where the game is at its best. Restricted to classroom use.

GIRLS BASKETBALL FOR BEGINNERS (bfs)

j-h 18 minutes bw: \$3.90 Thirteen- to fifteen-year-old girls in actual game situations illustrate the basic skills and rules of basketball. The number and positions of the players, the rules, scoring, fouls,

free shots, kinds of passes, dribbling, and types of basket shooting are all included.

GIRLS IN WHITE (mcgh)

h-c-a 18 minutes bw: \$3.75 Through the story of one girl, the film shows the training one receives for the nursing profession including basic training, clinical work, and surgery assistant.

GIRLS, LET'S LEARN SOFTBALL (uw)

j-h-c 20 minutes bw: \$4.10 Mimetic instruction, or the technique of encouraging imitation for better form and greater skill as shown in this film is an entirely new kind of instruction. A unique film in that it is addressed to teachers as well as to students. This is softball instruction at its best.

GOLF MISTAKES (tfc)

h-c-a 11 minutes bw: \$1.65 Horton Smith, Lawson Little, Harry Cooper, and Jimmy Thompson demonstrate good and bad golf techniques. Restricted to class-room use.

GOOD GROOMING FOR GIRLS (c)

j-h 10 minutes color: \$3.40 Anne spends an evening with Rosemary and learns that the secret of achieving an attractive appearance is the result of a carefully followed routine of good grooming: a well-planned wardrobe, attention to hair, nails, teeth, cleanliness, posture, proper diet, and rest.

GOOD GROOMING FOR GIRLS: HAIR CARE (ifb)

j-h 14 minutes color: \$4.70 The way to care for healthy hair — to bring out its lustrous, natural beauty — and to arrange it in a way that frames the face flatteringly are the subjects of this film. Close-ups of teen-age models make hair care techniques easy to understand and apply.

GOOD GROOMING FOR GIRLS: MAKE-UP (ifb)

j-h 11 minutes color: \$3.70 The steps in care of the complexion and application of make-up are depicted and discussed: proper soap and water cleansing, application of powder, use of lipstick brush and shaping of the lips, and eye make-up to achieve a natural effect. The result—demonstrated by three pretty teen-age models—is an appearance of healthy, happy, and natural good looks.

GOOD GROOMING FOR GIRLS: POSTURE (ifb)

j-h 9 minutes color: \$3.40 Demonstrating the need for good posture as an essential attribute of an attractive appearance, this film reminds us that if a girl stands well, she will actually be healthier, because good circulation and healthy nerves are related to proper posture. Models demonstrate correct and incorrect posture. Examples of good carriage are shown.

GOOD GROOMING FOR GIRLS: WARDROBE (ifb)

j-h 14 minutes color: \$4.70 Shows how to use care and intelligence in choosing garments and accessories for school and social occasions. Propriety of dress to occasion, suitability of accessories, neatness of shoes and stockings, camouflaging overweight and underweight tendencies and other physical conditions by style selection, seasonal suitability, importance of posture—these are among the things illustrated in this film.

GOOD SPEECH FOR GARY (mcgh)

c-a 20 minutes bw: \$4.15 The story of a second grade boy who has been helped to overcome his stuttering by the cooperation of teachers, parents, and classmates. Effective techniques and various teaching aids for correcting speech defects are used such as flannelboard, radio, puppets, choral speaking, social-drama, etc.

GOOD SPORTSMANSHIP (c)

i-j 10 minutes bw: \$2.15 What is good sportsmanship? Through lively story situations, the audience sees examples of good sportsmanship in action. Importance of sportsmanship in all phases of daily living is emphasized.

GOODBYE, MR. GERM (ntb)

j-h-c-a 15 minutes bw: \$2.65 Presents basic facts about tuberculosis largely by means of animated cartoons. The germ "Tee Bee" tells the story of his life, while the doctor tells the germ of the modern way of fighting tuberculosis.

GREAT BALLERINA (brf)

h-c-a 6 minutes bw: \$1.65 Features the great Russian ballerina, Galina Ulanova, in a portion of Tschaikowsky's "Swan Lake Ballet."

GREY TROUT (nfbc)

j-h-c-a 14 minutes color: \$2.15 The lakes of northern Ontario provide plenty of scenic camping sites, as well as deluxe accommodations for the ardent angler. Depicts the art of trout catching by showing the experiences of a party of fishermen camping on the shore of a lake. Describes the grey trout's distinguishing features and comments on the observance of conservation practices as well as on how to deal with full-sized cagey fighters.

GROWING UP (PREADOLESCENCE) (c)

i-j color: \$3.40 Children illustrate variations in the normal growth process. Animation and silhouette photography help show that growing up is an uneven process which differs between boys and girls and varies with individuals and age. The role of the endocrine glands in controlling growth is explained along with health measures which aid the normal growing process.

GUARD YOUR HEART (br)

h-c-a 27 minutes bw: \$5.15 Sam Taylor, a middle-aged man, exerts himself and tires his heart. When he pays a visit to his doctor, the latter tells him about the structure and function of the heart and advises him to slow down. Sam eventually adjusts to his new schedule.

GYMNASTICS: PART I (php)

j-h-c-a 16 minutes bw: \$3.65 Slow and fast motion photography catches expert gymnasts performing on the parallel bars, long horse, rope climb, and tumbling.

GYMNASTICS: PART II (php)

j-h-c-a 16 minutes bw: \$3.65 Expert gymnasts demonstrate perfection of form in the free exercise, rings, side horse, and high bar. Some action scenes are in slow motion.

H — THE STORY OF A TEEN-AGE DRUG ADDICT (mcqh)

h-c-a 22 minutes bw: \$4.15 The case history of a teen-age boy and his fight with drugs—how he encounters drugs and becomes an addict, and how he solves his problem.

HARNESS CHAMPIONS (uw)

j-h-c-a 9 minutes bw: \$1.70 Tom Berry, famed race driver, is seen in the training of pacers and trotters with revealing slow-motion shots. Scenes of typical harness racing show some of the dangers that drivers face.

HEADSPRINGS IN THE GYM (eb)

j-h 9 minutes bw: \$2.15 Demonstrates the three fundamental parts of the headspring — the angle headspring, the push-up to the handstand, and the landing. Illustrates the use of a box and a mat as a base for the spring, and portrays a running start. Slow motion photography allows unhurried study of action and techniques.

HEALTH HEROES: THE BATTLE AGAINST DISEASE (c)

i-j-h 11 minutes bw: \$2.35

The contributions of five great men in the battle against disease are examined within an historical framework. We see how Van Leeuwenhoek began the study of bacteria by improving the microscope; how Jenner developed the concept of vaccination; how Pasteur's and Koch's study of microorganisms threw light on the causes of disease; and how Lister helped demonstrate the relationship between sanitation and health.

HEALTH IN OUR COMMUNITY (eb)

i-j 15 minutes color: \$4.70 Dramatizes the work of the Department of Health — both the everyday activities required to safeguard the community and the crises which result from the outbreak of a dangerous disease. Stresses the teamwork between public health personnel and private medical people in dealing with community health programs: unsanitary living conditions, industrial hazards, accidents, contagious disease, and the danger of contaminated foods. Presents a case study of medical detective work — a fight to prevent an epidemic of typhoid fever.

HEALTH: YOUR CLEANLINESS (mcah)

i-j 13 minutes bw: \$2.15 Designed to promote more healthful living by giving a lesson on health habits applying to personal cleanliness.

HEALTH: YOUR CLOTHING (mcgh)

i-j 11 minutes bw: \$2.15 Dramatizes the suitable clothing to wear for health.

HEALTH: YOUR FOOD (mcgh)

i-j 18 minutes bw: \$3.65 Percival Pate, who wouldn't eat anything but sweets, is visited by Nutrition (a puppet) and is convinced that by eating meat and vegetables he will become stronger and happier.

HEALTH: YOUR POSTURE (mcgh)

i-j 12 minutes bw: \$2.15 A girl who has always been a wallflower finds that good exercise, work, and sleep will correct her posture and help her overcome her difficulties.

HEALTHY FEET (c)

i-j 11 minutes bw: \$2.25 The structure of the foot is explained with the use of X-ray and animation. The slow motion camera shows the function of each part in body motion. The importance of healthy feet and proper care to prevent skin diseases and other dangers is emphasized.

HEALTHY LUNGS (c)

j-h 10 minutes bw: \$2.15 Knowledge of the structure and work of the lungs helps us to understand how to protect them from infection and injury. Shows the windpipe, larynx, bronchial tubes, small air tubes, and the tiny air sacs. Animation demonstrates how the exchange of waste products for oxygen takes place.

HEALTHY SKIN (c)

i-j 11 minutes bw: \$2.25 The importance of clean and healthy skin is explained in relation to the structure and function of the skin. Animation aids are utilized in examining pores, sweat glands, oil glands, blood vessels, nerve endings, and other parts of the skin.

HEART AND CIRCULATION (eb)

i-j-h-c-a 10 minutes bw: \$2.15 Shows how heart and blood vessels circulate blood throughout the body. Animated drawings depict the nature of the circulatory system and muscular and valvular heart action. Shows factors affecting rate of heart beat, flow of blood from severed artery, and effect of severing cervical nerve.

HEART DISEASE (THE SEARCH) (cbs)

h-c-a 27 minutes bw: \$5.65 The results found by a group of specialists who have been examining 500 healthy, normal men for the past seven years have been analyzed and interpreted at the University of Minnesota and presented as an integral part of the study of heart disease.

HEART DISEASE: ITS MAJOR CAUSES (eb)

h-c-a 11 minutes bw: \$2.15 Discusses, by using photographs, X-ray photographs, and animated drawings, what happens when a human heart no longer functions normally. Conditions explained are: high blood pressure, hardening of the arteries, and rheumatic fever.

HEART: HOW IT WORKS (mcgh)

j-h 14 minutes bw: \$2.65 A normal heartbeat is amplified to show how it sounds through a stethoscope. The structure of the heart, the flow of blood through it and the functions of its parts are shown in animation. Methods of testing the heart, facts about its workload, and the ways to maintain a healthy heart are illustrated.

HEART, LUNGS, AND CIRCULATION (c)

i-j 10 minutes color: \$3.60 How the heart, lungs, veins, arteries, and capillaries work together in the process of circulation is explained. Animation, cinefluorography and a unique combination of artwork and a live subject visualize key functions. Principles to help maintain healthy heart and lungs are suggested.

HELEN KELLER IN HER STORY (dro)

i-h-c-a 45 minutes bw: \$6.15 HELEN KELLER IN HER STORY, as narrated by Miss Katharine Cornell, is a simple, honest, tremendously moving film. It was produced by Nancy Hamilton and other devoted friends and neighbors of Miss Keller. In bringing her life story to the screen, Katharine Cornell, Martha Graham, Gladys Swarthout and President Eisenhower gave freely of their time and talents. Helen Keller, playing her own role, surpassed even the greatest actress, as she evoked the personal drama of her unique and dramatic story of courage, faith, perseverance, and hope.

HELP WANTED (usbm)

j-h-c 33 minutes bw: \$2.15 Deals with the basic information contained in courses for beginners in first aid. Demonstrates recent methods of artificial respiration. Shows treatment of burns, shock, bleeding, and simple and compound fractures. Indicates pressure points, uses of bandages and tourniquets, and ways of transporting the injured.

HIGH JUMP (c)

j-h 9 minutes bw: \$2.15 The side roll and belly roll are demonstrated by regular, slow and stop-motion photography. Eight exercises are included for the development of the muscles and special skills involved in the high jump. The film also shows training for the high hurdles, and stresses the importance of body rhythm.

HIGH JUMP (TRACK AND FIELD INSTRUCTION SERIES) (rf)

j-h-c 13½ minutes bw: \$2.60 Shows principles of the high jump. The technique is shown through the analysis of championship-type jumps. With the aid of slow motion, the essential points of form are made vivid. In the film we work with an inexperienced candidate and put him

through the drills needed to acquire good form.

HITTING IN BASEBALL (eb)

j-h 11 minutes bw: \$2.15 Professional players demonstrate each essential detail of effective batting. Describes three accepted methods for gripping the bat, proper stance, and the correct and accepted "swing." Slow-motion, stop-motion, and close-up photography add to the effectiveness and superimposed drawings help in clarifying difficult techniques.

HOME NURSING (eb)

j-h-c 11 minutes bw: \$2.15 Demonstrates the proper procedures in caring for the sick in the home. Shows the ways of bathing and moving the patient in bed, arranging the bed, and making the patient generally comfortable. Also describes the techniques of taking and recording temperature, pulse and respiration rates, giving medications, and helping the patient gradually regain strength during convalescence.

HOME NURSING: FUNDAMENTALS (c)

j-h-a 14 minutes bw: \$2.90 Shows such nursing techniques as arranging the sick room, making the bed, taking morning care, giving medicine according to doctor's instructions, washing and serving the patient as well as suggestions on convalescent care.

HOT ICE (sf)

j-h-a 9 minutes bw: \$2.15 Shows the growing-up of a sport—ice hockey. The development of hockey, from "shinny" on the school pond to the excitement at the Garden, as Toronto and the Rangers clash in the "fastest game on earth."

HOUSE OF MERCY (mcgh)

h-c-a 14 minutes bw: \$3.85 When a father learns that his boy has been injured playing ball, he visits the hospital for the first time, and when he learns his son is to receive expert attention and will soon be up, he tours the various departments and learns how scientifically and efficiently the staff works.

HOW ANIMAL LIFE BEGINS (uw)

h-c 9 minutes bw: \$1.50 Short version of IN THE BEGINNING, portrays the ovulation, fertilization and early development of the mammalian egg.

HOW DISEASE TRAVELS (UW)

i-j 11 minutes color: \$2.60 Animation is used to explain that harmful microbes are spread by water, air, insects, and personal contacts. Shows why measures must be taken to stop the spread of disease at its source, and that sanitation, and sometimes even isolation, is necessary to prevent further infection. A Walt Disney Production.

HOW MUCH AFFECTION (mcgh)

h-c-a 19 minutes bw: \$4.65 How much affection should there be between a couple that is going steady? How far can young people go in petting and stay within the bounds of social morals and personal standards? This film is intended to stimulate frank and constructive discussion among young people.

HOW OUR BODIES FIGHT DISEASE (eb)

i-j 8 minutes bw: \$2.15 Gives an imaginative demonstration of our body's ability to prevent and to fight disease. Live photography and animation show the three lines of defense—skin and mucous membranes, lymph system, and the blood.

HOW THE EYE FUNCTIONS (kb)

j-h-c 11 minutes bw: \$2.15 The film presents facts regarding "accommodation," or focal adjustment of the eyes. This is preceded by introductory anatomical matter and illustrated by means of animated drawings.

HOW THE RESPIRATORY SYSTEM FUNCTIONS (br)

j-h-c 10 minutes bw: \$2.15 Explains air passages and their functional purposes. Mechanism of breathing, action of the ribs and diaphragm are shown by animation. Necessity of proper posture, exercise, plenty of fresh air and rest are emphasized.

HOW TO AVOID MUSCLE STRAINS (br)

h-c-a 14 minutes bw: \$3.15 Using live models and animated drawings, this film illustrates the mechanics of muscular activities. Shows the analogy between the three types of levers and certain arrangements of bones and muscles in the human body. Shows the correct and incorrect ways of lifting objects and illustrates the effects of overstrain on the vertebral column. Concluding section deals with the difficult subject of hernias.

HOW TO BE WELL GROOMED (c)

j-h 10 minutes bw: \$2.15 Shows how two young people improve their personal appearance through attention to good grooming. Demonstrates to students the four fundamentals of appearance: good health, good posture, cleanliness, and neatness. The students will realize that in friendships and in business, success depends

HOW TO CATCH A COLD (kc)

a great deal on good grooming.

general 10 minutes color: \$.50 Shows how colds are spread, how a day or so in bed helps protect the entire community, and how a simple cold may actually be the first symptom of a far more serious illness.

HOW WE HEAR (kb)

h-c 11 minutes bw: \$2.15 A complete and comprehensive explanation of the entire ear structure and its mechanism.

HOW YOU SEE IT (jh)*

j-h-c-a 11 minutes bw: \$2.15

Tells the story of persistence of vision and how it makes motion pictures possible. Animated drawings show how the image of an object is transmitted by the optic nerve to the brain, and how the image fades instead of stopping abruptly when the object is removed from the field of vision. Application of the principle to a series of photographs makes them appear in a continuous unbroken motion.

HUMAN BODY: CIRCULATORY SYSTEM (c)

j-h-c 14 minutes color: \$4.00 The entire circulatory system is analyzzed by means of animation, cinefluorography, drawings, and close-ups of live organs. Included are the heart, lungs, and kidneys; the key processes of the circulatory system and the network of arteries and veins that carry blood throughout the body. Significant terms are overprinted for emphasis.

HUMAN BODY: EXCRETORY SYSTEM (c)

j-h 14 minutes color: \$4.50 A study of the structure and functions of the excretory system is presented. The main organs of the system, the kidneys, are explained in detail. We learn that through the processes of filtration of wastes, and the re-absorption of needed nutrients, the kidneys carry on their main function—regulation of the composition of blood. The role of the skin in removing water from the body is also discussed.

HUMAN BODY: THE DIGESTIVE SYSTEM (c)

j-h-c 14 minutes color: \$4.15 Animation, X-ray, and live action scenes of the major digestive organs give a detailed account of the function of this system — to break down chemically the complex nutrients, carbohydrates, proteins, and fats into simple food materials. The roles played by the salivary glands, esophagus, stomach, pancreas, liver, gall bladder, and small and large intestines are closely defined and related to each other.

HUMAN BODY: THE NERVOUS SYSTEM (c)

j-h-c 14 minutes color: \$4.20 This film study of the nervous system emphasizes the basic function of this system, its main organs, the various neurons of which these organs are composed, and the principal areas of the brain. Microscopic views of nerve tissue and a specimen of a human brain with animation and anatomical charts will help students visualize this complex system and gain a better understanding of its control of the body processes.

HUMAN BODY: REPRODUCTIVE SYSTEM (c)

bw: \$2.90 j-h 16 minutes color: \$4.50

Through animation and photomicrography, including the actual view of fertilization of a human ovum, the film presents clearly and accurately the structure and functions of the human reproductive system and the processes involved in the phenomenon of human birth. It is recommended that this film be shown to boys and girls in separate groups.

HUMAN BODY, THE: RESPIRATORY SYSTEM (c)

j-h 14 minutes color: \$4.80 This film locates and describes the organs of the respiratory system, and shows in animation and live demonstration the mechanics of ventilation and the physics of diffusion between alveoli and capillaries. We see the effect on the respiratory system of varying needs for oxygen and eliminating carbon dioxide.

HUMAN BODY: SKELETON (c)

j-h-c 10 minutes color: \$3.40 Uses cinefluorography to view the skeletal structure in action. Stresses the complexity of the system and shows how the skeleton protects, moves, and supports the body.

HUMAN BRAIN (eb)

j-h 11 minutes bw: \$2.15 Defines the brain and compares its development in several animals and in man. Differentiates the functions of the medulla and cerebellum and describes the cerebrum in detail. Also illustrates the cerebral functions of perception, motor control analysis, integration and response to stimuli.

HUMAN DIGESTION (ath)

j-h-c 10 minutes bw: \$2.15 Describes the principal steps in the digestive process beginning with the stimulation of the organs of digestion by the sight and smell of appetizing food. Demonstrates how the food we eat is made available for the growth, energy, and repair of all our body cells.

HUMAN GROWTH (uo)

i-j-h-c 19 minutes color: \$6.15

Permits the facts of human sex to be discussed without embarrassment or tension. In a straight-forward, unemotional manner, the film treats the differences between boys and girls in their rate of physical and sexual maturity; the glands which control physical and sexual activity; the male and female sex organs; menstruation; fertility, pregnancy and birth. The vocabulary is kept as simple as possible without sacrificing essential meanings.

HUMAN HAIR, THE (br)

j-h-c 9 minutes bw: \$2.15

Presents a description of the hair as a part of the skin and its analogous development and growth by live photography and animated drawings. Depicts the cause and appearance of "goose flesh." Explains the importance of the hair to one's personal appearance and its characteristics as a part of the human anatomy.

HUMAN HEART, THE (brf)

h-c-a 9 minutes bw: \$1.90 The mechanics and functions of the heart are described with diagrams and experiments.

HUMAN HEREDITY (cw)*

j-h-c-a 20 minutes color: \$6.00 The film depicts facts concerning human heredity, sex roles and determination as well as the influence of environment on behavior and attitudes. Separates facts from superstition.

HUMAN MACHINE (mis)

j-h-c-a 16 minutes color: \$4.30 This film compares body parts and operations with man-made machines. How parts of the body function together is also described.

HUMAN REPRODUCTION (mcgh)

h-c-a 22 minutes bw: \$4.40 This is a factual film on the human reproductive systems and on the process of normal birth. Models and animated drawings are used throughout the film to describe the anatomy and physiology of the individual reproductive organs of both men and women. The film stresses the biological normalcy of reproduction and the importance of clear, objective knowledge concerning marriage and parenthood.

HUMAN SKELETON (uw)

j-h-c 11 minutes bw: \$2.15 The function of the skeleton is one of support, protection and movement. The structure of the various types of joints is treated in detail. Elbow and wrist actions are demonstrated by means of X-ray photography.

HUMAN SKIN, THE (br)

j-h-c 11 minutes bw: \$2.15 Depicts the important functions and the anatomical structure of the human skin by use of animated drawings and photography. Includes a descriptive explanation for the permanency of fingerprints.

HUMAN THROAT, THE (br)

j-h-c 11 minutes bw: \$2.15 Describes the throat, consisting of pharynx and larynx, from the anatomical and functional aspect. Depicts the movements of the rimal opening between the vocal cords during breathing and voice production, including an actual photograph of vibrating vocal cords.

HURDLES, THE (uw)

j-h-c 10 minutes bw: \$2.15 In stressing fundamentals, condition and form, this film demonstrates basic hurdling styles, rear hip and leg action, rhythmic running, calisthenics, body balance, correct clearance, and circular stepover action.

HURDLES (TRACK AND FIELD INSTRUCTION SERIES) (rf)

j-h-c 13½ minutes bw: \$2.60 Shows principles of the hurdles. The technique is shown through the analysis of championship-type jumps. With the aid of slow motion, the essential points of form are made vivid. In the film we work with an inexperienced candidate and put him through the drills needed to acquire good form.

I AM AN ALCOHOLIC (mcgh)

h-c-a 18 minutes bw: \$3.85 The story of Alcoholics Anonymous. Through the experiences of one man, this film portrays the steps taken by members of AA to bring that man back to his rightful place in society, to a regaining of health, happiness, and self-respect. The origin and development of Alcoholics Anonymous is then pictured.

ICE CAPERS (of)

i-j-h-c-a 10 minutes bw: \$1.50 Champion Irving Jaffe demonstrates his style and speed with discussion on: how ice-skate shoes should fit, how to conquer fear the first time, balance, how to break a fall, how to get up, ways of stopping, turns, couple skating, and figure skating. A comic on ice skates is also shown.

ILLINOIS FOOTBALL HIGHLIGHTS OF 1953 (ui)

general 36 minutes bw: no charge Describes the Illinois football team in action in 1953.

IMMUNIZATION (eb)

j-h 11 minutes bw: \$2.15 Explains what immunization is and how immunity to infectious diseases is attained. Attention is first called to the fact that immunity to some diseases is effected through actual illness; then animated drawings and natural photography depict how immunization is effected by the injection of vaccine into a human body so that the body may build up resistance to an infection without actually having the disease.

IMPROVING AMERICA'S HEALTH (c)

j-h 11 minutes bw: \$2.35 America's health has been greatly improved since the turn of the century. The film shows how expanded health and medical services have increased life expectancy through the conquest of communicable diseases, and points out the importance of education and individual responsibility. We learn that America's health problem today lies in the area of noncommunicable diseases.

IMPROVING YOUR POSTURE (c)

j-h 10 minutes bw: \$2.15 Why should so many suffer poor posture when good posture is easy? Here is a film that shows the major areas of the body by which posture is controlled. It demonstrates that good posture is: a balance of opposing sets of muscles. And it teaches methods of maintaining good posture, stressing relaxation, self-diagnosis, and correction.

IN THE BEGINNING (uw)

j-h-c 17 minutes bw: \$2.65 Using the reproductive organs of the female rabbit for illustration, we see the mysterious prologue of life—the ovulation, fertilization, and early development of the mammalian egg. Very remarkable microphotography brings into view scenes of the spermatozoa attacking the ovum, and time lapse cinemicrographs show us the stages of cell division in the fertilized egg.

IN THE ROUGH (of)

general 10 minutes bw: \$1.70 Champion golfer Johnny Farrell explains that golf has no age limit. He goes on to explain and demonstrate several good golfing tips.

INFECTIOUS DISEASES AND MAN-MADE DEFENSES (c)*

j-h 11 minutes color: \$3.60 This film shows some of the causes of infectious diseases and explains how we use man-made defenses to protect ourselves. Also, how antitoxins, vaccines, antibiotics and synthetic drugs are produced and used to help active and passive immunity in the body.

INFECTIOUS DISEASES AND NATURAL BODY DEFENSES (c)*

j-h 11 minutes color: \$3.60 This film provides an introduction to the complex subject of immunology. Shows outer and inner body defenses, the work of mucus and cilia, inflammation and the work of white blood cells, the filtering action of the blood, and how antibodies work.

INFIELD PLAY AT FIRST AND THIRD (anl)

h-c-a 18 minutes bw: \$3.15 Gil Hodges, George Kell, Bob Elliott, and Ferris Fain demonstrate in regular and slow motion action, defensive play at first and third base.

INSECTS AS CARRIERS OF DISEASE (iiaa)

h-c-a 10 minutes color: \$2.40 Shows how the fly, mosquito, and louse spread dysentery, malaria, and typhus. Explains what everyone should do to get rid of these disease carriers.

INTERIM REPORT (mtp)

h-c-a 14 minutes bw: \$2.15 A dramatization of the work of the National Foundation for Infantile Paralysis in the struggle against this crippling disease. Illustrates the search for a vaccine which would keep the virus from entering the nervous system and the actual development of the new Salk Vaccine.

INTERMEDIATE TUMBLING (c)

j-h-c 10 minutes bw: \$2.15 This film includes twenty stunts in handspring, balance, and somersault progressions. Companion stunts are shown and safety spotting is indicated. The film emphasizes the prevention of accidents while teaching students technique and form.

INTRODUCTION TO FIELD ARCHERY (hca)

j-h-c-a 10 minutes color: \$3.60 The popular game of field archery is explained in an entertaining way. A family of four are introduced to field archery. How they learn the game and become entusiastic followers of the sport is shown. A film that will double the interest of the archer who has never played the game and create interest in the nonarcher to start playing.

INTRODUCTION TO THE ART OF FIGURE SKATING (nfbc)

j-h-c-a 11 minutes bw: \$2.15 Barbara Ann Scott demonstrates the fundamentals of figure skating. Types of skates, basic figures and analysis of a few more complex turns.

JAVELIN (uw)

j-h-c 10 minutes bw: \$2.15 In stressing fundamentals, condition and form, this film demonstrates the four stage catapult throw; run, strike, stance; hand and finger grips; balance of stomach and back muscle tension; throwing angle; and body and leg coordination.

JUMPS AND POLE VAULT (eb)

j-h 11 minutes bw: \$2.15 Advantage is taken of slow motion photography for purposes of detailed study of form. Includes demonstration from actual competition in the running high jump; running broad jump; hop, step, and jump; and the pole vault. Provides opportunity for detailed study of the various techniques employed by champions.

KEEPERS OF THE LAMP (mpa)

h-c-a 22 minutes bw: \$3.15 Why do girls choose nursing as a career? Four nursing students are shown during their nursing school days and engaged in the field each chooses — general duty, surgical nursing, public health, and military service.

KEEPING CLEAN AND NEAT (eb)

i-j 11 minutes bw: \$2.15 When two eighth grade students visit a lower grade classroom to choose helpers for their assembly program, the younger children begin to realize the value of making a good appearance. Through trick photography, two of the youngsters are whisked back to their homes to retrace—and improve—their routine for keeping clean and neat. Taking the boy and girl separately, the film illustrates a practical, step-by-step routine for washing, dressing, grooming, and caring for their clothes.

KENTUCKY DERBY STORY (rko)

general 17 minutes bw: \$3.85 Advance preparations for the Kentucky Derby involve a year's work. The mounting excitement as Derby Day approaches, activities at Churchill Downs, and the 75th running in 1949, as described by Clem McCarthy.

KIDNEYS, URETERS, AND BLADDER (br)

h-c 11 minutes bw: \$2.15 Anatomical features of the kidneys, the ureters, and the urinary bladder. Animated drawings describe the functioning relationship of the parts of the system, the process of urine formation, and the elimination of waste matter.

LABOR AND CHILDBIRTH (ma)

c-a 17 minutes bw: \$4.15 Diagrams show the main muscles involved in labor. Explains the three stages of labor, emphasizing when to go to the hospital, what to expect there, and the need for confidence and relaxation. The birth of the baby is shown by diagrams. Pictures the labor room, delivery room, and nursery of the hospital.

LARYNX AND VOICE (FUNCTION OF THE NORMAL LARYNX) (nw)

h-c-a 20 minutes color: \$4.95 Shows by ultra-high speed photography, just how the larynx and vocal cords function. The differences of the larynx in the male and female are pointed out. We also see the different movements of the vocal cords caused by high, medium, and low pitch tones. Part of the film is black and white.

LEADERS FOR LEISURE (ai)

c-a 20 minutes color: \$5.95
Stresses the importance and need for professionally trained leaders to insure the success of a community recreation program. It dispels the misconceived idea that a community can make a recreation program work by merely providing facilities. Shows dramatically why leadership is the key to success, how to choose recreation leaders, and how to utilize them to build an effective program.

LEARNING ABOUT OUR BODIES (c)*

i-j 11 minutes bw: \$2.15 Basic structure of the human body and the position and function of the major organs. Explains that the body must be kept in good condition if it is to work properly.

LEARNING ABOUT YOUR NOSE (eb)

i-j 9 minutes color: \$2.90 Explains how the nose serves as a hall-way between the changeable outside world and the sensitive breathing organs. Demonstrates the nose as a sterilizer, cleanser, air conditioner and humidifier, and suggests proper nasal health practices.

LEARNING TO SWIM (mcgh)

i-j 11 minutes bw: \$2.15 Demonstrates and explains fundamental steps required of the beginner in learning the Australian crawl. Shows the importance of developing confidence while in the water, learning to use the body's buoyancy, proper leg and arm actions, and correct breathing.

LET'S DANCE (c)

j-h-c 12 minutes color: \$4.50 A visual presentation of the fundamentals of ballroom dancing. Starting with the proper manner of walking and standing, the film proceeds to show in simple and clear demonstration how to hold one's partner, the seven basic dancing positions, how to lead and follow, the pattern of a typical dance step, and proper etiquette on the dance floor.

LET'S GO FISHING (of)

j-h-a 10 minutes bw: \$1.70 Reviews briefly the universality of the sport, and proceeds from country-brook and string-fishing lines to the high seas and mechanical harpoons. Includes fishing trips for different types of salt water game fish, and the problems, hazards, and thrills of catching sailens, tarpon, swordfish, and whales. The equipment and methods used to catch each species and the peculiar behavior of each

fish are shown and explained. The climax is the chase, harpooning, and capturing of a sixty-foot, twenty-ton whale.

LET'S SQUARE DANCE: SPLIT THE RING (iu)

j-h-c-a 10 minutes color: \$3.40 Shows by live and animated photography the square dance figure "Split the Ring," and illustrates and explains background terms and movements relative to this figure. Uses normal speed and slow motion photography as three squares of dancers demonstrate the various movements involved.

LET'S SQUARE DANCE: TAKE A LITTLE PEEK (iu)

j-h-c-a 10 minutes color: \$3.40 Teaches the square dance figure "Take a Little Peek," with synchronous music and action. Presents live and animated demonstrations of the dance at regular speed and in slow motion, and explains the positions of partners, how to honor corners and partners, and how the steps are performed to facilitate the continuity of the dance. Pictures groups dancing the figure to regular square dance music in a natural situation.

LIFESAVING (usda)

j-h-c-a 15 minutes bw: \$2.65 Demonstrates the swimming strokes best adapted to life saving; approaches; breaking holds; carries; and methods of rescuing by boat and by ring buoy. Includes a complete picturization of the Schafer method of resuscitation.

LOU GEHRIG'S GREATEST DAY (YOU ARE THERE) (cbs)

j-h-c-a 27 minutes bw: \$5.65 Although Lou Gehrig, himself, had created some memorable experiences in his time as a great baseball player, it was the public who gave him his greatest thrill with their day of appreciation to this man who was to leave the job he loved best because of an incurable illness.

LOUIS PASTEUR, THE BENEFACTOR (pf)

j-h-c-a 16 minutes bw: \$3.50 Portrayed by the famous French actor, Sacha Guitry, we follow Pasteur's career through his struggles against the prejudices of organized medicine, his experiments in fermentation, anthrax, and the first rabies treatment of a boy bitten by a mad dog.

LOUIS PASTEUR - MAN OF SCIENCE (sf)

j-h-c-a 30 minutes bw: \$4.65 Louis Pasteur's scientific activities and discoveries from 1856 to 1895 in the fields of chemistry and microbiology relating to pasteurization, silkworm diseases, the use of antiseptics, puerperal fever, streptococcus, staphylococcus, chicken cholera, and rabies.

LOVE THAT BEAUTY (mcgh)

h-c-a 17 minutes bw: \$3.65 Shows what is done in beauty parlors to beautify the American woman as well as to reduce her weight.

MAGIC ALPHABET (tfc)

j-h-c 11 minutes bw: \$1.65 Tells the story of a cure for beriberi by Dr. Christian Eijkman's discovery of Vitamin B₁. Reviews the discovery of other vitamins and their purposes. Stresses the importance of sufficient vitamin intake necessary to maintain good health. Restricted to classroom use.

MAKING OF A SHOOTER (silent) (jh)

j-h-c-a 30 minutes color: \$2.15 Demonstrates in three films the proper safety procedures to employ in gun handling while target shooting, hunting, or formalized shooting in competition. Champion shooters teach a young man in the proper way to care for and safely use a rifle during international matches. Hunting and target shooting scenes are also utilized to illustrate the proper use of a rifle and shotgun.

MAKING THE MOST OF YOUR FACE (c)

j-h 11 minutes color: \$3.40 Facial beauty begins with certain basic health habits—proper diet, rest, and good skin care. But also important to a girl's appearance are hair styling and the careful use of make-up. The film stresses that hair styles should be selected on the basis of what is best for the individual and that lipstick, eye make-up, and powder should be used sparingly and in good taste.

MAN AGAINST MICROBE (mli)

j-h-c-a 11 minutes bw: \$2.15
The war which medical science has successfully waged against disease. A dramatic portrayal of the London Plague in 1665. Scenes present Leeuwenhoek, Pasteur, Lister and Von Behring. Features practical application of scientific discoveries, as in diphtheria immunization, milk pasteurization, the prevention of sepsis, etc.

MAN ALIVE (acs)

a 11 minutes color: \$2.15 Animated film to interest the layman and develop a realistic attitude toward cancer. Includes psychology of fear of cancer. Suggests steps for early detection and successful treatment.

MAN TO MAN (mhfb)

h-c-a 33 minutes bw: \$5.65 Shows how important it is to our mental health to have personal relationships we can trust and depend on. This is illustrated by the story of Joe Fuller, a psychiatric aide, and his gradual realization of the importance of day-to-day, minute-to-minute relationship with his patients as an important factor in helping them regain their health. Patience and understanding prove to be the tools that may mean the difference between recovery and chronic illness.

MATT MANN'S SWIMMING TECHNIQUES FOR BOYS (c)

i-j-h 18 minutes bw: \$3.55 Mann's teaching techniques for the crawl, backstroke, breast and butterfly strokes are illustrated from land drills to slow motion analyses in water.

MATT MANN'S SWIMMING TECHNIQUES FOR GIRLS (c)

i-j-h 11 minutes bw: \$2.15

The elements of four basic strokes are shown—the crawl, backstroke, breast stroke, and flying fish. A class demonstrates proper arm motion, kicking action, breathing, and body streamlining. Relaxation is emphasized for good swimming technique.

MATTER OF TIME (mtp)*

h-c-a 12 minutes color: \$2.15 Medical science's fight against heart disease. Main types of heart disease are discussed and some simple rules of health for a longer, happier life are provided.

MECHANISMS OF BREATHING (eb)

j-h-c-a 11 minutes bw: \$2.15
The breathing mechanism in operation. Technical animation portrays gaseous exchange in the lungs and body tissue cells, including pathological conditions. A demonstration of artificial respiration is provided. By means of animation and photography the nervous control of breathing and factors affecting rate and depth of breathing are shown.

MEDICAL TECHNOLOGIST - CAREER (acs)

h-c-a 22 minutes color: \$2.15 Designed to interest high school students in careers in medical technology. Joan visits a hospital laboratory. She observes how during an operation, a technologist slices a bit of tissue and stains it, so the pathologist

can determine the extent of the operation. She watches a bacteriologist making a sensitivity test to determine the antibiotic most suitable to combat the bacteria. Then, as a student, Joan performs a blood grouping test.

MEDICINE — AVIATION MEDICINE (THE SEARCH) (cbs)

h-c-a 25 minutes bw: \$5.65 With man's flying into outer space and new problems of human endurance developing with respect to high altitudes and great speeds, there is a need for experiments to determine the limits that the human body can stand. The test run by the USAF School of Aviation Medicine reveal these limits.

MEN OF MEDICINE (mcgh)

j-h-c-a 14 minutes bw: \$3.15 Singles out a typical doctor and follows him through his painstaking period of training. Tells how he feels when he receives his first fee, makes his first call, and performs his first operation.

MENTAL HEALTH (eb)

h 12 minutes color: \$4.40 Defines good mental health, describes its characteristics, and discusses its importance to the individual and to society. Sets forth a series of simple, straightforward rules for "keeping mentally fit," and illustrates them with incidents from the lives of various members of a high school graduating class.

bw: \$3.15

MENTAL ILLNESS: PART I (THE SEARCH) (cbs)

h-c-a 26 minutes bw: \$5.65 The examining, testing, and treatment of mentally ill people at Tulane University. Explains and demonstrates the use of psychotherapy, the use of sodium amytal, and other methods of helping the neurotic.

MENTAL ILLNESS: PART II (THE SEARCH) (cbs)

h-c-a 26 minutes bw: \$5.65 A continuation of Part I, showing the research and treatment of the mentally ill being conducted at Tulane University. Deals mainly with psychotics and highlights the theory that the brain is actually malfunctioning pathologically at the time of mental illness. Shows brain wave tests on normal and sick persons, the use of sodium amytal, and electric shock therapy.

MENTAL SYMPTOMS SERIES

The following nine films demonstrate some manifestations of various mental disorders. In each motion picture, a psychiatrist describes the type of illness to be illustrated. An interview between the patient and the psychiatrist follows, in which typical symptoms are evident. Use of these films is restricted to professional audiences and audiences with a continuing interest in mental health.

MENTAL SYMPTOMS SERIES: DEPRESSIVE STATES NO. I (mcgh)

c-a 12 minutes bw: \$2.15 Demonstrates some manifestations of the agitated form of severe depression. A middle-aged patient suffering from recurrent depressions is shown on two occasions, first in the evening and again the following morning, noting the symptoms of pronounced motor agitation, depressed mood, feelings of hopelessness and sinfulness, and distinct fluctuation in his mood during the course of the day.

MENTAL SYMPTOMS SERIES: DEPRESSIVE STATES NO. II (mcgh)

c-a 12 minutes bw: \$2.15 Demonstrates some manifestations of the retarded form of depression and of a severe depression which has reached the point of attempted suicide. Two patients are shown. The first, a middle-aged woman, presents a picture of depression which is characterized by pronounced retardation. She has become extremely slow in her movements, speech and mental processes. The second is a young woman whose depression is the final reaction to an unbearable life situation and who has attempted suicide on two occasions.

MENTAL SYMPTOMS SERIES: FOLIE A DEUX (mcgh)

c-a 14 minutes bw: \$3.15

Presents a demonstration of symptoms of folie a deux, or induced insanity, in two patients — mother and daughter. The psychosis developed first in the daughter and was then communicated to the mother, who is very dependent upon and has a close emotional attachment to her child. The daughter expresses a number of grandiose delusions and delusions of persecution, which ideas the mother accepts as reality.

MENTAL SYMPTOMS SERIES: MANIC STATE (mcgh)

-a 14 minutes bw: \$3.15

A patient exhibits characteristic symptoms of the chronic manic state: the triad of symptoms which reflect exaggeration of otherwise normal moods of behavior—overactivity, increased and accelerated ideation, elation.

MENTAL SYMPTOMS SERIES: ORGANIC REACTION - SENILE TYPE (mcgh)

11 minutes bw: \$2.15 Two patients — a woman and a man — both

suffering from senile psychosis, evidence impairment of intellectual functions in such symptoms as a loss of memory, disorientation in time, perseveration of ideas, confabulation, brief span of attention, and delusions.

MENTAL SYMPTOMS SERIES: PARANOID CONDITIONS (mcgh)

11 minutes bw: \$2.15 Shows two patients; the first, an acute paranoid exhibiting a delusional system in which the government and religion play an important role; the second, a chronic paranoid with delusions of persecution by a powerful

MENTAL SYMPTOMS SERIES: SCHIZOPHRENIA, CATATONIC TYPE (mcgh)

bw: \$2.15 11 minutes Three male patients who have been hospitalized for from five to fifteen years show such symptoms as lack of activity, obliviousness to their environment, negativism, inflexibility, and automatic obedience.

MENTAL SYMPTOMS SERIES: SCHIZOPHRENIA, **HEBEPHRENIC TYPE (mcgh)**

11 minutes bw: \$2.15 c-aA male patient, hospitalized for thirteen years, exhibits such symptoms as untidy appearance, stereotyped mannerisms, irrelevant and incoherent speech, disorganized think-

ing and poverty of ideas, and the senseless laughter and grimacing which characterize the hebephrenic.

MENTAL SYMPTOMS SERIES: SCHIZOPHRENIA, SIMPLE TYPE DETERIORATED (mcgh)

12 minutes bw: \$2.15 A female patient, psychotic for more than ten years, shows symptoms of apathy, indifference, inappropriate emotional reaction, gracelessness of posture, lack of ambition and initiative, and hallucinations.

MIDDLE DISTANCES (uw)

11 minutes bw: \$2.15 Demonstrates the importance of sprinting techniques, ball of the foot running, automatic stride, and pendulum and bicycle stride.

MIRACLE FROM MOLD (sf)

9 minutes bw: \$1.90 The scientific story behind terramycin is presented.

MIRACLE OF LIFE (al)

11 minutes By means of microscopic photography, the everlasting mystery of cell development, cell division, egg growth, insemination and life forms are vividly portrayed.

MIRACLE OF REPRODUCTION (sd)

17 minutes bw: \$3.90 Art drawings and live action photography show that all forms of life stem from a similar source — a tiny microscopic egg.

MOBILIZATION OF THE HUMAN BODY (asf)

14 minutes bw: \$3.45 Illustrates a series of stretches and pulls intended to loosen contracted fibrous tissues of the body through progressive stretching of the ligaments. Therapists use living models to demonstrate the exercises.

MODERN BASKETBALL (ihsa)

j-h 25 minutes bw: \$2.15 An interpretation of the basketball rules demonstrated by skilled high school and university players. Included are: how the ball becomes alive; how the ball becomes dead; illustration of personal and technical fouls; violations; rights of player in possession of ball; player without the ball; feinting; screening; and air dribble.

MODERN DANCE (uuh)

15 minutes bw: \$3.75 j-h A high school dance class demonstrates dance composition and technique. The girls compose a dance of their own.

MODERN DANCE COMPOSITION (th)

12 minutes bw: \$2.60 h-c-aShows some of the techniques necessary for preparing the whole body for dance movement. Analyzes the elements of dance composition, and shows students how they can develop dances of their own, once they have an idea in mind. These points are then clearly illustrated in two dances entitled "Celebration" and "Lament."

MODERN GUIDE TO HEALTH (mcgh)

i-j-h-c-a9 minutes bw: \$2.15 Done altogether in animation, it uses a cartoon-type presentation to discuss such health factors as posture, selection and care of clothing, and the importance of sleep and

MODERN SURGERY (mcgh)

bw: \$3.15 20 minutes Follows a patient through an operation for gall stones, showing surgical techniques, preoperative and post-operative care, anesthetic techniques, surgical teamwork, and other things that go into safe, rapid surgical operations.

MOLLY GROWS UP (ma)

j-h 16 minutes bw: \$3.75 Presents the basic facts about menstruation with the story of a 13-year-old girl as she experiences her first menstrual period. Without being shocking, deals with the problems and information which girls want discussed.

MONARCHS OF THE RING (1st EDITION) (of)

h-c-a 9 minutes bw: \$1.70 Highlights of the following fights: Carpentier vs. Dempsey; Willard vs. Firpo; Firpo vs. Dempsey; Paolino vs. Willis; Dempsey vs. Tunney; Louis vs. Schmeling; and Galento vs. Louis.

MONARCHS OF THE RING (2nd EDITION) (of)

h-c-a 9 minutes bw: \$1.70 Highlights of the following fights: B. Baer vs. Doyle; Leonard vs. Tendler; Sharkey vs. Maloney; and Schmeling vs. Walker.

MONARCHS OF THE RING (3rd EDITION) (of)

h-c-a 9 minutes bw: \$1.70 Highlights of the following fights: Carnera vs. Schaff; Tunney vs. Dempsey; Battalino vs. Chocolate; and Tunney vs. Carpentier.

MONARCHS OF THE RING (4th EDITION) (of)

h-c-a 9 minutes bw: \$1.70 Highlights of the following fights: Firpo vs. Brennan; Ross vs. Patrol; Dempsey vs. Sharkey; Louis vs. Lavinsky.

MONKEY ON THE BACK (mcgh)

c-a 30 minutes bw: \$5.65 An actual case history of a man who struggles against drug addiction for twenty years and finally dies from an overdose. Discusses causes and consequences of addiction for the individual and society.

MOSQUITOES AND MALARIA (eb)

j-h-c-a 10 minutes bw: \$2.15 Traces discoveries which revealed that mosquitoes are carriers of the malaria microbe and that the microbe emanates from the Anopheles mosquito. Presents the life of the mosquito, its breeding places, and the effect of its poison upon human blood.

MOVEMENTS OF THE TONGUE IN SPEECH (ifb)

h-c-a 17 minutes color: \$3.40 Shows movements of the human tongue and lips during the speech of a male patient,

part of whose right cheek was removed by a surgical operation.

MOVING X-RAYS (al)

j-h-c-a 11 minutes bw: \$2.15 Demonstrates the application of X-rays on motion picture film. By using motion picture X-rays, we are able to watch all the actions is contributions of modern science has been put into practical use.

MUSCULAR SYSTEM (uw)

j-h-c 11 minutes bw: \$2.15 A human model demonstrates the action of muscles in maintaining body posture in standing and moving positions. As the model moves, animated diagrams and X-ray photography are superimposed on it. Arm movement is shown through action of biceps, triceps, and related muscles. The position, attachment, function of muscle related to bones and joints are explained.

MY CHILD IS BLIND (uw)

h-c-a 20 minutes bw: \$3.15 Shows how a blind child, given patient treatment and proper training at a special nursery school for blind children, can be taught to do many things normal children do.

NAME UNKNOWN (sd)

j-h-c 10 minutes bw: \$2.15 Intended to warn boys and girls against becoming victims of sex criminals. Through several episodes — a lovers' lane, baby sittings, and a pickup — teen-age boys and girls come to understand why it is much better to be aware of possible perils and avoid them, than to take dangerous chances.

NATION'S MENTAL HEALTH (mcgh)

c-a 19 minutes bw: \$3.90 Shows the facilities for training doctors and psychiatric personnel in three hospitals in Topeka, Kansas; the various methods of therapy for psychiatric patients and the work of the National Association of Mental Health in helping communities to set up mental health clinics.

NERVOUS SYSTEM, THE (eb)

j-h-c 11 minutes bw: \$2.15

Animated drawings describe the structure and function of the central nervous system, including the anatomy of the spinal cord, axones, dendrites, nerve bundles, receptor and effector organs. The nature of the nerve impulse and reflex arc also are presented. Microphotography reveals the intricate nature of nerve cells. Close-ups compare the

differentiated reactions of an amoeba, a plant, a frog, and a cat. Amplified sounds of actual nerve impulses in man and a cat are reproduced.

NEW FRONTIERS OF MEDICINE (mcgh)

j-h-c-a 17 minutes bw: \$3.00 Here are the newest medical miracles—sulfa, penicillin, streptomycin, the artificial kidney, brain surgery—discovered by the specialist and the research scientist. The film also discusses the Rh blood factor and the new developments in nutrition, as well as the progress made in the study of heart diseases and cancer.

NIGHT JOURNEY (rem)

c-a 30 minutes bw: \$6.65 Under the direction of Martha Graham, the story of Oedipus Rex is portrayed by dance and music. The dance begins with a scene that took place after Oedipus has become blind.

NINE BASIC FUNCTIONAL SYSTEMS OF THE HUMAN BODY (br)

h-c 11 minutes bw: \$2.15 The principal and basic constituents of the human system are set forth by means of animated drawings in nine groups — circulatory, nervous, sensory, digestive, lymphatic, endocrinal, skeletal, muscular, and excretory. The description of each group is confined to essential facts.

NINE BAD SHOTS OF GOLF (mcgh)

h-c-a 10 minutes color: \$3.15 Experts have analyzed all major golf faults, broken them down into nine bad shots, and shown exactly how to correct each one in a combination of straight action, slow-motion photography, and "freeze frame" shots.

NO SMOKING (sd)

j-h 10 minutes bw: \$2.15 A boy and girl start to light a cigarette. The narrator stops them and explains how smoking costs each smoker \$150 to \$500 per year, and affects the health and length of life of smokers.

NOISE AND HEALTH (THE SEARCH) (cbs)

h-c-a 28 minutes bw: \$5.65

Noise has a very great effect on the health and stability of people. This is the conclusion reached by the officials at the University of California at Los Angeles. Specialists on the science of acoustics are in the process of developing new methods of noise control in order to give the maximum satisfaction and protection to the human being.

NONE FOR THE ROAD (ya)

j-h-c-a 14 minutes bw: \$3.40 A discussion of the problem of teenage drinking and driving, made in cooperation with the Yale Center of Alcohol Studies. Three college men, one doing no drinking, one drinking beer, and one drinking heavily, are studied. Depicts an accident from only casual drinking before driving.

NORMAL BIRTH, A (ma)

h-c-a 11 minutes bw: \$2.85 Birth of a child, from the time the mother enters the delivery room until she leaves it. Because of the subject matter, the film is for distribution only to qualified persons and for showing to properly constituted groups under the supervision of a qualified leader.

NORWEGIAN FOLK DANCES (afr)

j-h-c-a 11 minutes color: \$3.40 Distinctive dance routines of Norway as handed down from generation to generation. Background music accompanies the dancers, who execute three routines: Reibender, Sprindans, and Fire Turen.

NOSE: STRUCTURE AND FUNCTION (eb)

bw: \$2.15 color: \$3.40 By use of animation and microphotography, the nose is described according to physiology and its functions of breathing and smelling. The protective system of the breathing organs and the reasons for breakdowns in the nasal passages are also explained.

NOSE, THROAT, AND EARS (mcgh)

h-c-a 11 minutes bw: \$2.40 Animated drawings of the nose, throat, and ears are utilized extensively so that the student may clearly see their structure and functions, and thereby understand the recommended procedures for their care. Shows how infection, once started, may spread throughout the nose, throat, and ears because of continuous mucous membrane lining.

NURS!NG (vgf)

h-c 11 minutes bw: \$2.15 Nursing is divided into three groups: private nursing, public health nursing, and institutional nursing. Shows the variety of activities while in training. Explains the advantages of nursing and analyzes the qualifications and requirements necessary to be successful in the field of nursing.

NUTRITIONAL NEEDS OF OUR BODIES (c)

i-j11 minutes bw: \$2.35 Using photomicrography, laboratory animals

and animation, this film shows how food provides the body's basic needs. The student will learn about the four general groups of foods, of the nutrients which they contain, and what the nutrients supply the body.

OBESITY - PROBLEMS OF FAT FORMATIONS AND OVERWEIGHT (eb) bw: \$2.15

color: \$3.40 13 minutes h-c-a Illustrates fat formation and utilization in the human body. Analyzes physiological and psychological causes of overweight. Explains the danger of uncontrolled fat accumulation and reveals ways in which body weight can be controlled.

OFFICIAL BASKETBALL (ihsa)

27 minutes color: \$2.15 Demonstrations involve official rules interpretations covering screening, traveling, jump ball, front and back court, throwins, free throws, personal and technical fouls, rebounding, and unusual and often misunderstood play situations. Shows the important part played by the rules in keeping the three S's in the game of basketball namely: speed, science, and skill.

OFFICIAL FOOTBALL (ihsa)

bw: \$2.15 28 minutes Rules of the officials and how they are carried out are shown. The duties of each official are explained and demonstrated. All illegal maneuvers are demonstrated.

OLYMPIC GAMES - 1952 (uw)

j-h-c-a 29 minutes bw: \$4.15 The highlights of the major competitions held in Helsinki, Finland. Emphasizes the activities of the U.S. athletes.

OLYMPIC WINTER THRILLS (of)

9 minutes bw: \$1.70 i-h-c-a Depicts the 1948 Olympics held in Switzerland. Includes scenes of hockey, figure skating, skate racing, bobsled racing, and skiing.

ONE AGAINST THE WORLD (tfc)

11 minutes bw: \$1.65 Dr. Ephriam McDowell, ridiculed by his profession and threatened by his neighbors, performs a major operation on a human being in Danville, Kentucky, on Christmas Day, 1809. Restricted to classroom use.

ONE DAY'S POISON (ifb)

30 minutes bw: \$5.75 general A film about the work of the Poison Control

Center at the Toronto Sick Children's Hospital. Several dramatized incidents illustrate the variety and number of accidental poisonings among children. The film shows examples of parental carelessness that may lead to tragedies.

146,000 COULD LIVE (230,000 WILL DIE) (acs)

30 minutes bw: \$2.15 A dramatic representation of the dangers of cancer. Dr. J. Cameron, Head of the American Cancer Society, narrates this absorbing film. He describes symptoms of the disease and interviews people who have had cancer, but who, because of either luck or wisdom found out about it early enough and were

OPEN T FORMATION (gf)

10 minutes color: \$3.40 Shows open plays, trick and pass plays of the T formation.

OTHER CITY (acs)*

cured.

27 minutes color: \$2.15 Uses Racine, Wisconsin, to symbolically de-

pict the tragedy of the 75,000 who die needlessly of cancer each year. Shows how Racine becomes a silent city without life. Illustrates the contrast between a cycle of orderly growth and nature unruly and without order. Portrays the seven danger signals of cancer.

OUR TEETH (kb)

10 minutes bw: \$2.15

Shows the growth and structure of our teeth, with emphasis on their organic vitality. Besides furnishing complete factual information about our teeth, it gives reasons rather than methods for oral hygiene.

OUT OF TRUE (ifb)

41 minutes bw: \$7.15 h-c-a Through domestic strain, the mind of a young wife and mother temporarily gives way. After she attempts suicide she is taken to a mental home where modern methods of analysis and treatment disclose the longhidden cause of her trouble.

OUTBOARD FISHERMAN, U.S.A. (usdi)

color: \$2.15 j-h-c-a 30 minutes Contains scenes from ten areas in the United States and Alaska showing the catching of ten different species of fish and shellfish using various fishing techniques. Shows how fishermen contribute to the national econ-

PATHWAY INTO LIGHT (bis)

j-h-c-a 19 minutes bw: \$3.15 The work of Louis Braille who developed the alphabet for the blind. Describes the process of the Braille system and shows how books are printed. We see how blind children are taught to read in special schools.

PAY ATTENTION (nyu)

c-a 31 minutes bw: \$5.55
Shows the education and personality problems faced by the child who is hard of hearing, but is not "deaf." Suggests ways in which parents, teachers, and specialists can help. Selected pre-school, school age, and high school children who are hard of hearing are followed through a variety of problems and remedial techniques. The use of "context" methods of teaching speech reading and early use of hearing aids where appropriate are stressed.

PERSONAL HEALTH FOR GIRLS (c)

j-h-c 10 minutes bw: \$2.15 An attractive high school girl shows the daily health habits so necessary to social poise and self-confidence. Cleanliness, proper complexion care, moderate exercise, and a balanced diet are some of the essential features. For girls only.

PERSONAL HYGIENE FOR BOYS (c)

j-h-c 10 minutes bw: \$2.15 A high school boy learns hygiene habits necessary for good health and good social living. Stress is upon cleanliness — how and why — with special emphasis on particular problems of adolescent boys, such as shaving and complexion. For boys only.

PERSONALITY AND EMOTIONS (eb)

j-h-c-a 13 minutes bw: \$3.45 A study of personality and mental health. An overview of the development of emotions from infancy through early childhood. Implies that emotional maturity is a desirable goal in the development of personality.

PERSONNEL DAMAGE CONTROL: ARTIFICIAL RESPIRATION (caa)

j-h-c-a 8 minutes color: \$2.15 Demonstrates artificial respiration in counteracting effects of drowning, asphyxiation, or electrical shock. Shows the prone position of the victim, and the position of the person practicing artificial respiration.

PERSONNEL DAMAGE CONTROL: HEAT EXHAUSTION, SUNSTROKE, AND BURNS (uw)

h-c-a 9 minutes bw: \$1.65 Explains the symptoms of and demonstrates first aid measures for heat exhaustion, sunstroke, and burns. Defines first, second, and third degree burns.

PHEASANT FEVER (sf)

h-c-a 11 minutes color: \$3.40 Pictures the training of a young dog in field work.

PHYSICAL FITNESS (THE SEARCH) (cbs)

h-c-a 27 minutes bw: \$5.65 What makes a champion? This question is being answered by the results of tests and experiments being carried on at the University of Illinois. Gives certain types of exercise and training designed to keep one in good condition, in order to help extend the average life span.

PHYSICAL REHABILITATION (THE SEARCH) (cbs)

h-c-a 27 minutes bw: \$5.65 Demonstration and explanation of new skill and techniques in the field of physical medicine and rehabilitation are presented by the New York University research department in a story form. The causes and results of experimentation are centered around the physical rehabilitation of a paraplegic war veteran.

PIGSKIN CHAMPIONS (tfc)

j-h-c 10 minutes bw: \$1.45 The Green Bay Packers demonstrate football techniques. Shots of routine plays including the forward pass, off-tackle play, place kick, double spinner, block kick, hidden ball play, a short pass, and a short lateral pass are shown. Restricted to classroom use.

PITCHING STARS (ihsa)

j-h 18 minutes bw: \$2.15 Baseball pitchers in action as they demonstrate form and style of delivery. Many greats of the diamond are used as illustrations.

PLAY BALL (mcgh)

j-h-c-a 14 minutes bw: \$3.10 Operation of a major-league baseball club, methods of recruiting talent, and sidelights on many well-known players.

PLAY BALL, SON (ya)

j-h 17 minutes bw: \$3.40 A group of high school boys expertly demonstrate the correct techniques of play at all positions on the baseball team.

PLAY BETTER GOLF: PART I (of)

h-c-a 9 minutes bw: \$1.65 FUNDAMENTALS: Lloyd Mangrum, Sam Snead, Patty Berg, and Jim Ferrier show the "know how" of the three fundamentals of good golf — correct grip, aim, and swing.

PLAY BETTER GOLF: PART II (of)

h-c-a 9 minutes bw: \$1.65 ADVANCED: The champions show applied

ADVANCED: The champions show applied techniques in overcoming hazards and obstacles — high grass, water hazards, tree blocks, and sand traps. Special attention to proper clubs, chip shots and putting.

PLAY CHAMPIONSHIP BASKETBALL (asf)

j-h-c 60 minutes bw: \$9.15 Demonstrations of shooting, passing, dribbling, tapping, screening, blocking, use of arms and hands, defense on jump, guarding the shooter, infractions, drills, types of plays, and all major phases of court play. Basketball fundamentals demonstrated by the two-time national championship Oklahoma A & M team with All-American Bob Kurland and Coach Henry Iba. Specifically designed as a coach's training aid.

PLAY VOLLEYBALL (asf)

i-j-h-c-a 20 minutes bw: \$3.25 Slow motion and stop action photography

Slow motion and stop action photography are used to clarify the essentials of volley-ball. A full explanation of the game intends to promote its finer qualities.

PLAYTOWN, U.S.A. (ai)

color: \$6.65 h-c-a 25 minutes Here is a fast-moving story of how a medium-sized American community, Decatur, Illinois, organized and developed an outstanding community recreation program. It takes you pictorially through the planning stages, the promotion program, and finally shows you one of the finest all-year community-wide recreation programs in the United States. This documentary-type film presents convincing evidence of what can be done, with limited funds, to provide recreation activities for each person in a community.

POLE VAULT (c)

j-h 7 minutes bw: \$2.15
Beginning pole vaulters are instructed in basic fundamentals. Experts in the vault indicate the preparation of the pole, length of the run, approach, pushup, and final turn of the body as the athlete clears the bar. A complete analysis of the technique of vaulting, with emphasis on coordination and timing.

POLE VAULT (TRACK AND FIELD INSTRUCTION SERIES) (rf)

j-h-c 13½ minutes bw: \$2.60 Shows principles of the pole vault. The technique is shown through the analysis of championship-type pole vaults. With the aid of slow motion, the essential points of form are made vivid. In the film we work with an inexperienced candidate and put him through the drills needed to acquire good form.

POSTURE AND EXERCISE (eb)

j-h-c 11 minutes bw: \$2.15 Describes and explains muscle activity and physiology of exercise. The various concepts presented include the relation of the nervous system to the skeletal muscles; motor units of work; muscle tonus in relation to posture; development of endurance; and peripheral circulation as it is related to general physical efficiency.

POSTURE AND PERSONALITY (ssf)

j-h 11 minutes color: \$3.50 Emphasizes the correlation between posture and personality by showing the influence of posture upon appearance and the efficiency in sports, games, making friends, and getting a job.

POSTURE HABITS (c)

i-i 11 minutes bw: \$2.15

This film develops posture consciousness and motivates the cultivation of good posture habits. It treats standing, walking, and sitting positions, using a puppet to explain bodily structure, showing scrapbook examples of good posture among adults, and why posture is important.

PRENATAL CARE (ma)

h-c-a 21 minutes bw: \$4.65 Diagrams show the female organs and the changes that take place during pregnancy. Emphasizes the fact that the prospective mother should work with the doctor and her husband in planning exercise, diet, and clothing. Diagrams show the development of the embryo, with emphasis on the weight gain during the last three months.

PREVENTING THE SPREAD OF DISEASE (nmp)

10 minutes bw: \$2.15

Communicable disease may be reduced if the individual and the community take strong measures of control. Both need to cooperate in order to prevent epidemics.

PROBLEM DRINKERS (mcgh)

h-c-a 19 minutes bw: \$3.55 Takes you step-by-step through an alcoholic's downfall and his rehabilitation. Tells what has been done by such organizations as Alcoholics Anonymous, the Research Council of Problems of Alcohol and the Yale School of Alcohol Studies to control alcoholism and have it recognized as a disease.

PROFILE OF A PROBLEM DRINKER (mcgh)

c-a 27 minutes bw: \$5.65 An absorbing portrayal of the causes and effects of liquor in the life of a young architect. Analyzes some of the reasons which may lead a person into problem drinking.

PROFILES OF ELEMENTARY PHYSICAL EDUCATION (c)

c-a 34 minutes bw: \$6.45 Stresses successful methods used in teaching physical education in kindergarten through the elementary grades. It urges careful organization and presents many ideas for the guidance of class activities.

PROMENADE ALL — WESTERN SQUARE DANCING (ga)

h-c-a 9 minutes bw: \$2.15 Includes 18 or more different figures of popular and exhibition squares. Produced with the cooperation of the Folk Dancing Federation of California and its member clubs.

PROPER STEPS (asf)

j-h-c-a 10 minutes bw: \$2.15 Offers suggestions on how to avoid foot trouble, and points out common foot abuses and errors in walking habits.

PUBLIC ENEMY NO. 1 (wctu)

h-c-a 20 minutes bw: \$3.25
Photographed against a panorama of Pacific Coast and mountain scenery, the film depicts a vacation taken by a doctor and his two sons. During the trip the doctor tells his sons about alcohol and the alcohol problem; how alcoholic beverages are made, advertised, and sold; their damaging effect on mind and body, and how the use of alcoholic beverages leads to ruined lives, broken homes, and to vice and crime.

QUEST, THE (ifb)*

general 35 minutes bw: \$5.55 The dramatic story of the discovery of insulin in the struggle against disease. The film depicts the work, discouragement and poor conditions that surround Dr. Frederick Banting and his associate, Charles Best, in their fight against time and the skepticism of other doctors, which resulted in victory over diabetes. The story dramatizes the odds against them and the persistence that brought about one of medicine's greatest conquests.

RABIES (mcgh)

i-j-h-a 15 minutes bw: \$3.00 This film has been made to acquaint both children and adults with the facts about rabies — its cause, its effects and its control, using actual photographs of rabid dogs as well as specially-trained healthy ones.

RECREATIONAL AND OCCUPATIONAL THERAPY

c-a 14 minutes bw: \$2.65 Recreational and occupational activities must be fitted to the patient's condition. Considers individualized occupational therapy as supervised by the nurse, group occupational work in the hospital and community, and social recreation projects.

REHABILITATION OF RESPIRATORY PATIENTS (nfi)

c-a 11 minutes bw: \$2.15 Explains why the National Foundation for Infantile Paralysis cannot declare victory over polio until everything possible has been done for the casualties. Produced for doctors, nurses, physical therapists, social workers, and others who work with polio patients.

RELAYS, THE (uw)

j-h-c 10 minutes bw: \$2.15 In stressing fundamentals, condition and form, this film demonstrates passing, right and left exchange, merging of runners' speed, baton grips, start, cup style, overhand and underhand action, fly-scoop, and team work.

REPORT ON DONALD (um)

h-c-a 19 minutes bw: \$3.65 Entering college, freshman Donald Carter has a bad speech block and goes to the speech clinic for help. Donald's history is reviewed to indicate how his severe block developed. He then works with his difficulty at the clinic, gains control over his speech, and becomes a confident, socially well-adjusted person.

RESCUE BREATHING (afp)

general 20 minutes bw: \$4.35 Designed to teach the techniques of Rescue Breathing (mouth-to-mouth or mouth-tonose) to all ages in groups of all types. Re-enacts the laboratory experiments which scientifically proved that rescue breathing is far superior as an emergency source of life-saving oxygen than the manual methods of artificial respiration. Demonstrates exactly how rescue breathing is used to save the lives of unconscious victims of drowning, drugs, electric shock, gas asphyxiation, and chest injury.

RESCUE SQUADRON (caa)

h-c 17 minutes bw: \$2.15 Depicts the operation of the Air Rescue Service in the salvage of human life, both military and civilian, in times of disaster.

RESPIRATION (uw)

j-h 11 minutes bw: \$2.15 Shows movements of the diaphragm and thorax in breathing, along with functions of the nasal passages, trachea. Includes both internal and external respiration, and pictures the distribution of oxygen by means of the circulatory system and release of energy by oxidation of food.

REST AND HEALTH (c)

j-h 10 minutes bw: \$2.15

Burning the candle at both ends — that was George lately. Training for the conference track meet, trying to keep those grades up, not getting enough sleep — even Sue was beginning to notice the change in him. The coach succeeds in showing George the importance of enough rest and sleep, and their effect on every daily activity. Explains the fundamental facts about rest and teaches students to build correct rest habits.

RETRIEVERS AT WORK (kvf)

h-c-a 11 minutes color: \$3.40 The following dogs are shown being trained and then as finished retrieving dogs: Black Labradors, Chesapeakes, Goldens, and Irish Water Spaniels.

RETURN TO LIFE (ui)

h-c-a 24 minutes color: \$2.15 Many services are performed by the University of Illinois' Division of Services for Crippled Children. A case history involving a little girl with a congenital heart malformation brings to light how they assist children. Other services described pertain to hearing problems, polio, spastic paralysis, and other diseases.

RHYTHMIC EXERCISES (bfs)

i-j-h 11 minutes bw: \$2.15 Presents a group of junior high school boys, illustrating rhythmic techniques, in a series of exercises done to a simple melodic background. Each element is demonstrated in slow-motion detail.

RIDING THE CREST (pf)

general 10 minutes bw: \$1.70 The film taken at Waikiki, Hawaii, depicts the art of surf-board riding and outriggering.

ROAD TO HEALTH AND HAPPINESS (kb)

j-h 11 minutes bw: \$2.15 Mentions diet, rest, safety, school nurse, school examination, immunization and tuberculin test, correction of deformed faces and irregular teeth, medical and dental examination and shows an effective way to care for the mouth, teeth, and body.

ROLLER SKATING: ROLLER RHYTHM (rko)

h-c-a 7 minutes bw: \$1.65 Demonstration by some of the roller rink champions along with general shots of the sport.

ROSE BOWL GAME OF 1952 (ui)

general 36 minutes bw: \$5.15 Every exciting play of Illinois' 40 to 7 conquest of Stanford in the 1952 Rose Bowl Game. Johnny Karras, Bill Tate, and Tommy O'Connell spark the Illinois offense. See Chuck Boerio's great line backing and watch Bill McColl, giant Stanford end, in action.

RUNNING BROAD JUMP (TRACK AND FIELD INSTRUCTION SERIES) (rf)

j-h-c 13½ minutes bw: \$2.60 Shows principles of the running broad jump. The technique is shown through the analysis of championship-type jumps. With the aid of slow motion, the essential points of form are made vivid. In the film we work with an inexperienced candidate and put him through the drills needed to acquire good form.

RUTH ST. DENIS AND TED SHAWN (WISDOM SERIES) (eb)

j-h 30 minutes bw: \$6.15 Interviews two of the most distinguished founders of the modern dance in America. The conversation covers many phases of their life and work during the past half century and the film features performances of three dances they created which greatly influenced American choreography: "Incense" and "White Nautch" by Miss St. Denis and "Japanese Warrior" by Mr. Shawn.

RX — THE STORY BEHIND YOUR DOCTOR'S PRESCRIPTION (i)

h-c-a 18 minutes bw: \$2.15 A survey of how the resources of chemical and biological sciences contribute to medical services throughout the world. Modern manufacturing methods set up a system of standards and control for ether, preventive vaccines, insulin, and antibiotics. Points out value of a brand name to products.

SADLER'S WELLS BALLERINA (mcgh)

j-h-c-a 11 minutes color: \$4.15 Tells the story of a young dancer about to make her debut. Behind her lie countless hours of exercise, study, and rehearsal. Ahead of her, if she succeeds, the role of a featured ballerina. More than the glamour of the theater, this film emphasizes the sacrifice and hard work that underlie any artist's success.

SAFE SWIMMING (gpp)

i-j-h-a 10 minutes bw: \$2.15 An appeal to youngsters to swim in supervised places where there is lifeguard protection rather than in the treacherous unsupervised areas. Health information is combined with the appeal to safety.

SAVE THOSE TEETH (eb)

i-j 10 minutes bw: \$2.15 Emphasizes the importance of proper cleaning in the care of teeth, and illustrates how the teeth are affected by excessive use of refined sugar. Identifies the kind of bacteria that change sugar to acid in the mouth. Demonstrates the use of sodium fluoride solution in the prevention of tooth decay and prescribes specific rules to be followed in the care of teeth.

SCHOOL HEALTH IN ACTION (6)

h-c-a 25 minutes bw: \$4.95 Shows how voluntary local health groups composed of parents and local professional people can work to achieve a healthful environment, health instruction, and health services in the school.

SECOND SIGHT (mcgh)

j-h-c-a 15 minutes bw: \$3.75 Describes the work of the Guide Dog Foundation at Smithtown Branch, Long Island, in the training of blind persons and seeingeye dogs. Demonstrates through the experience of a blind man how dog and master learn to work together.

SEIZURE (uw)

c-a 48 minutes bw: \$6.85 Explains the diagnostic and therapeutic treatment of epilepsy through a dramatized story of an epileptic veteran, the background of his condition, and his treatment in a Veterans Administration hospital. Describes the physiological basis of epilepsy, clinical manifestations of common types of seizures, and socio-economic problems facing an epileptic.

SHOOTING IN BASKETBALL (eb)

j-h 10 minutes bw: \$2.15 Utilizes unique motion picture techniques to demonstrate fundamentals of effective shooting in basketball. Illustrates correct stance, grip, aim, throwing action, finger-tip control, propulsion, and follow-through. Emphasizes effectiveness of the medium-arc trajectory.

SHOT PUT (uw)

j-h-c 11 minutes bw: \$2.15 In stressing fundamentals, condition and form, this film demonstrates tension control, finger and hand grip, fitting styles to physiques, finger and wrist snap, foot positions, explosive hip snap, and progressive tension and effort.

SHOT PUT (TRACK AND FIELD INSTRUCTION SERIES) (rf)

j-h-c 13½ minutes bw: \$2.60 Shows principles concerning the throwing of the shot put. The technique is shown through the analysis of championship-type throws. With the aid of slow motion, the essential points of form are made vivid. In the film we work with an inexperienced candidate and put him through the drills needed to acquire good form.

SHOULD YOU DRINK? (mcgh)

h-c-a 21 minutes bw: \$4.85 Designed to promote discussion and self-analysis about reasons for moderate drinking, this film dramatically focuses attention on the importance of each person making an honest and intelligent decision about the use of alcohol. A young couple gives a party to which they invite four other couples. During an ensuing discussion, different views are expressed about drinking. The film ends as the narrator poses several questions about the reasons behind a person's use of alcohol and his attitudes toward drinking.

SIMPLE STUNTS (c)

i-j-h 11 minutes bw: \$2.15 This film gives a detailed explanation of simple stunts for strength, stunts for skill, and stunts with sticks. Safety precautions are emphasized and the benefits of variations on simple stunts are demonstrated.

SITTING RIGHT (asf)

i-j-h 11 minutes bw: \$2.15 The technique of sitting correctly — how to sit down and how to get up. Leg, arm and hand positions are shown.

SIXTEEN TO TWENTY-SIX (nfbc)

a 17 minutes bw: \$3.35 Designed for female audiences only, this film presents facts about the extent, transmission, course of infection, symptoms, and treatment of gonorrhea and syphilis.

SKATING FANTASY (sf)

i-j-h-c-a 10 minutes color: \$3.10 Barbara Ann Scott does three skating ballets.

SKELETON, THE (eb)

j-h 12 minutes bw: \$2.15 Describes in detail the formation, growth, development, and function of the human skeleton. Microphotography and animated drawings reveal what bones consist of and how they grow. Dramatic motion picture X-ray photography shows how joints move. Attention is called to the role of proper food and good posture in the correct development of bone.

SKI THRILLS (sm)

general 11 minutes color: \$3.40 Thrilling and beautiful color shots of expert skiers enjoying themselves on the high expanses of the Sierra Mountains.

SKIN (silent) (eb)

i-j-h 15 minutes bw: \$1.65 Contrasts the skins of various animals. It shows structure and method of growth of human skin; explains the sensation of touch, the formation of "gooseflesh," how hair "stands on end," the secretion of sweat, and the growth of hair and nails. Illustrates the proper care of the skin.

SMALL CRAFT SAFETY (ker)

i-j-h-c-a 14 minutes bw: \$2.90 Shows that the increased use of boating as a recreation makes it necessary for persons to be familiar with small craft safety. Points out common causes of accidents, how they can be avoided, stresses safe conduct, rules of boating, rescue and life saving techniques involved in canoes, rowboats, outboards, and small sailboats.

SNIFFLES AND SNEEZES (mcgh)

j-h 10 minutes bw: \$2.35 Why colds start, how they spread and what to do to prevent them are shown in this film. By means of a unique device, the film effectively portrays the most common ways in which cold-producing viruses are spread. It also shows ways in which the body defends itself against germs.

SNOW SPEED (uw)

i-j-h-c-a 7 minutes bw: \$1.70 Shows ski jump champions, speeding ice boats, a horse race on a frozen lake, and bobsledding at Mt. Rainier's winter sports carnival.

SOCCER FOR GIRLS (c)

j-h-c 10 minutes bw: \$2.15 Demonstrates the basic skills of soccer in easy-to-learn detail, with close-ups and slow motion, using skilled players. Includes the various kinds of traps, dribbles, and passes, and their applications to game situations.

SOCCER - THE UNIVERSAL GAME (hpa)

j-h-c-a 10 minutes bw: \$1.90 Intended as an introduction for Americans of all ages to the world's most widely played team sport—soccer. Demonstrates fundamentals and techniques of the game by means of both action shots and animated sequences.

SOCIAL DANCING (c)

j-h-c 10 minutes bw: \$2.15 Here are the two basic fox trot and waltz steps, with three simple variations. Both the boy's and girl's parts are shown in close view, and each step or variation is clearly explained with diagrammatic effects.

SOFIA GIRLS (fon)

j-h-c-a 11 minutes bw: \$1.90 Pupils of public school of Sofia parish in Stockholm are noted for their skill in gymnastics and rhythmics. The film shows the girls in the rhythmic exercises which have become associated with their name.

SOFTBALL FOR BOYS (c)

j-h 10 minutes bw: \$2.15 Play ball! Boys will rally to the call with added enthusiasm after seeing this fast moving film. They'll want to try that hook-slide, pull that fast double play, improve their bunting technique. Slow motion photography is used to analyze the individual player skills and the principles of team play in actual game situations. Emphasis is also placed on pitching techniques.

SOFTBALL FOR GIRLS (c)

j-h-c 10 minutes bw: \$2.15 Takes up the fundamental softball skills of throwing, catching, batting, and fielding. Each player's individual skill and coordinated teamplay is pointed out to show students how practice improves play.

SOFTBALL FUNDAMENTALS (ya)

i-j 11 minutes bw: \$2.15 Junior high school girls demonstrate the techniques of batting, throwing, pitching, base-running, and fielding in softball.

SOMETHING YOU DIDN'T EAT (wdp)

general 10 minutes color: \$3.00 Explains in entertaining details how one may learn to select a diet from the seven basic groups of foods to insure sufficient supply of the essential nutrients.

SPEED-A-WAY (lar)

j-h-c 10 minutes bw: \$2.15 This new game for boys and girls is a combination of the elements of soccer, basketball, speedball, field ball, and hockey with an opportunity for players to run with the ball.

SPEEDBALL FOR GIRLS (c)

j-h-c 10 minutes bw: \$2.15 Introduces students to an exciting game which is rapidly growing in popularity. The film lucidly explains players positions on the field, the rules of the game, techniques in developing team cooperation and individual skills—kicking, juggling, volleying, passing and receiving.

SPEEDWAY (of)

j-h-c-a 9 minutes bw: \$1.70 All types of automobile racing in France, England, and Monte Carlo along with thrills at the Indianapolis Speedway make this an interesting film.

SPINAL COLUMN, THE (eb)

j-h-c 11 minutes bw: \$2.15 Supplementing live action scenes with X-ray and stop-motion photography, animated drawings, and graphic close-ups, this film provides a detailed study of the structure and functions of the spinal column. The five spinal regions are identified. The curvatures of the spine are described, and the importance of good posture is stressed.

SPIRIT OF ALGONQUIN (nfbc)

general 19 minutes color: \$2.15 Follows the activities of boys and girls in their summer camps at Algonquin Park in Ontario. Under the guidance of experienced counsellors, they make the most of their idyllic vacation. They learn about creatures of the wild, and acquire the zestful skills of outdoor life—swimming, fishing, riding, canoeing, campfire cooking, and the lasting values of various experiences shared with others.

SPLITS, SPARES, AND STRIKES (tfc)

h-c-a 10 minutes bw: \$2.15 Championship form is demonstrated by Tillie Taylor, famous woman bowler. Restricted to classroom use.

SPORT'S GOLDEN AGE (mcqh)

h-c-a 15 minutes bw: \$3.85 Emphasizes America's propensity for sports of all kinds. Shows sports greats in action: Knute Rockne, Red Grange, Johnny Weissmuller, Jack Dempsey, Joe Louis, Bob Feller, Joe Dimaggio. Shows the making of sports equipment. Presents Americans enjoying sports from swimming to skiing.

SPORTS 'ROUND THE GLOBE (uw)

j-h-c-a 9 minutes bw: \$1.70 An exciting selection of outstanding sports events filmed by foreign cameramen—including bicycle polo, motorcycle soccer, oneleg skiing in the Alps, auto race on slippery roads, Grand National Steeplechase and other thrilling events.

SPORTS SPELLBINDERS (of)

j-h-c-a 10 minutes bw: \$1.70 Performers in this film feature skiing on sand and water, shooting dangerous rapids, mile-a-minute motorboat races, motorcycle races and ancient autos in daredevil races.

SPRINGBOARD AND FRONT APPROACH (uw)

j-h-c 11 minutes color: \$3.80 An excellent film on diving which stresses the importance of approach and spring. Slow motion photography analyzes approach, hurdle and take-off. Demonstrations by Olympic champion Vicki Draves.

SPRINGBOARD DIVING (uc)

j-h-c 13 minutes bw: \$3.90 Shows the fundamentals of springboard diving with detailed illustrations of the position of the body in the air, the proper use of feet and arms, and the approach and take-off from the springboard. Techniques for the swan dive, running front dive, and the back jump and exercises for control of the body in the air are also depicted.

SPRINGBOARD TECHNIQUES (c)

j-h 11 minutes bw: \$2.15 Proper use of the springboard is explained in this film as a prerequisite to skillful diving. Stop motion and slow motion are used for detailed analysis of lifts, tucks, somersaults, and other skills. Techniques are summarized in a final sequence of outdoor shots showing the finished performance of expert divers.

SPRINTS, THE (uw)

j-h-c 21 minutes bw: \$3.95 The fundamentals of the 100 and 220 yard dash, including impact style and natural stretch stride, synchronization of leg and arm action, starting techniques, placement and digging of start holes, foot movement, balanced arm action, backward arm jab, and the counterbalance of the arms.

SQUARE DANCE MEDLEY (of)

i-j-h-c-a 10 minutes bw: \$2.15 Includes the Lady Around the Lady; Duck for the Oyster, Dig for the Clam; and Hinky Dinky Parley Vous.

SQUARE DANCING (osg)

i-j-h-c-a 14 minutes color: \$4.15 The purpose of the film is to arouse interest and depict the fun and wholesome features of square dancing.

STEPS OF THE BALLET (eb)

j-h-a 25 minutes bw: \$4.65 The film shows the basic classical positions and movements of the ballet. During rehearsal, the work of the choreographer, the composer, and the designer are explained. Then a finished performance is presented. Music is played by the London Symphony Orchestra. Robert Helpmann, famous choreographer and dancer, is the narrator.

STORY OF DR. JENNER (tfc)

j-h-c-a 11 minutes bw: \$1.90 Dramatizes the story of Dr. Jenner, an English country physician. Describes how he tested and proved his theory of immunization through vaccination in defiance of vigorous opposition, and how he finally brought the dread plague of smallpox under control. Restricted to classroom use.

STORY OF MENSTRUATION (kc)

j-h-c-a 11 minutes color: \$.50 Animated drawings and diagrams are used to explain the physiology of menstruation in women. Suggests methods of care and hygiene, and encourages a healthy attitude toward the process. Special booklets and physiological charts are available for use with the film.

STORY OF THE BLOODSTREAM, PART I (mis)

h-c-a 30 minutes color: \$8.60
Tells the fascinating story of the most efficient pump in the world, the human heart. Pictures inside a beating human heart are made possible by an instrument designed and constructed in the Moody Institute of Science Laboratory. The circulatory system is revealed to have a hundred thousand miles of capillaries, many so small that the microscopic blood cells must squeeze through in single file.

STORY OF THE BLOODSTREAM, PART II (mis)

h-c-a 26 minutes color: \$6.65 Shows how life hangs by a very slender thread, the chemistry of the red blood cell. By radioactive tracer atoms the speed with which the blood carries food and oxygen to the trillions of body cells is dramatically illustrated. A search for the optimum shape of the red blood cell, aided by the famous IBM research computer, reveals that the cell's peculiar shape is just right for the job it has to do.

STREPTOMYCIN (uw)

j-h-c-a 10 minutes bw: \$2.15 Reviews the events and work that led to discovery of the drug streptomycin by Dr. Waxman at Rutgers University.

STUDENT NURSE (nfbc)

h-c-a 30 minutes bw: \$5.15

A picture of girls-in-training at a large city hospital. This film indicates some of the courses they must take before they are qualified to receive their caps—the insignia of success in the first stage of their careers. The practical part of nursing is illustrated as the student learns the art of changing the bed. Her duties include the personal care of the patient to maintain nutrition, relieve annoying symptoms and insure physical and mental rest.

STUTTERING (THE SEARCH) (cbs)

c-a 27 minutes bw: \$5.65 Consistent failure to find an organic basis for stuttering is presented with clinical evidence by the State University of Iowa. Explains through demonstrations the cause and cure of stuttering. Shows how parents can hinder with over-concern and how some severe cases can speak normally when attention is distracted.

SUN, SEA AND SAILS (uw)

j-h-c-a 7 minutes bw: \$1.70 Through beautiful marine photography shows yachts racing on the bay and deep sea.

SUN VALLEY SKI CHASE (of)

j-h-c-a 7 minutes bw: \$1.70 One skier is elected hare, and the others are the hounds, and the chase is on dangerous ski trails. Dangerous jumps, sharp turns, swift slaloms, and other dazzling techniques are demonstrated in this film taken in one of the world's most famous skiing areas.

SWAN DIVE AND FRONT JACK-KNIFE (uw)

j-h-c 11 minutes color: \$3.80 A diving film which teaches the steps to achieving perfect form on 1-meter board and in mid-air. Demonstrates abdominal muscle exercises for use in these dives.

SWIMMING AND DIVING ACES (uw)

general 11 minutes bw: \$2.15 Value of early training, need of stamina, and vital role of timing in diving are illustrated. Champions exhibit one and one-half forward somersault; one and one-half gainor; front jack with full twist; and back jack analyzed by slow-motion camera. Demonstration of component parts of skillful diving: balance, take-off, position of arms, motion in the air, and body position when entering water.

SWIMMING --- CRAWL STROKE (uw)

h-c-a 8 minutes bw: \$1.65 Illustrates the basic principles of the stroke—the arm movement, the kick, and breathing. Includes slow motion shots under water.

SWIMMING FOR BEGINNERS (of)

i-j-h 9 minutes bw: \$1.65 Instructing a 10-year-old child in the basic fundamentals of swimming, from the conquest of fear to breathing, arm strokes, and co-ordinated deep water swimming.

SWORDSMANSHIP (afla)

c-a 17 minutes bw: \$3.85 The challenge of a man's honor was stated, and the duel followed. A man's honor was saved or destroyed by his skill with a gun or sword. Today, the sport of swordsmanship is considered as one of the most exacting on the mind as well as the body. The blood and loss of life has been eliminated, but the thrills and excitement still remain. Demonstrated by members of the U. S. Olympic fencing team, this sport is brought to life with all the movements and basic fundamentals shown in excellent detail.

TABLE TENNIS (tfc)

j-h-c 9 minutes bw: \$1.65 Table tennis, with experts playing in singles and doubles, is shown here. After an explanation of the grip, the players demonstrate push shots, service, spin shot and return, forehand and backhand shots, and footwork. Restricted to classroom use.

TACKLING IN FOOTBALL (eb)

j-h 9 minutes bw: \$2.15 Utilizes slow-motion and stop-motion photography to analyze basic techniques in the shoulder tackle and cross-body tackle, together with the several variations of each type. Stresses the importance of correct starting position, speed, drive, sure grip, timing, and body control. Calls attention to safety measures designed to insure against injuries in tackling.

TARGET: TOOTH DECAY (uok)

h-c-a 11 minutes color: \$2.65 Points out the value of modern dental care with emphasis on sodium fluoride treatment. The opening sequence shows a group of Cleveland County Grade School children at play and raises such questions as: Are children so healthy after all? Aren't bad teeth too high a price to pay? What can be done about tooth decay? It then proceeds to answer the questions, suggesting, among other things, concerted community-wide action.

TECHNIQUE OF TENNIS (tfc)

j-h-c-a 9 minutes bw: \$1.65 - Tennis instructor, Lloyd Budge, brother of Don Budge, demonstrates correct practices in such fundamentals as forehand and backhand grips, routine shots, and service. Explanation of footwork, timing, and an exhibition of net play complete the film. Slow motion photography is used for showing form and technique. Restricted to classroom use.

TECHNIQUES OF FOIL FENCING (silent) (uc)

h-c-a 15 minutes bw: \$1.65

Analyzes fencing positions at various speeds with close-ups of footwork in advance, retreat, lunge and lump lunge; handwork in correct grip on French and Italian foil; straight thrust, disengage, one-two and one-two-three, double, coupe, coupe disengage and coupe-coupe; simple parry 4,6,7,8 and half circle, counterparry 4 and 6, stop thrust in high and low line. Begins and ends with a demonstration bout by Helene Mayer, United States and world champion.

TEETH, THE (eb)

i-j-h 10 minutes bw: \$2.15 Explains the development and structure of teeth and stresses the importance of proper care. Demonstrates the cause of decay and how it can be prevented by eating proper foods, brushing the teeth regularly and correctly, and consulting a dentist frequently. Reveals the growth cycle of teeth from embryonic stage through adulthood.

TEETH: THEIR STRUCTURE AND CARE (c)

j-h 11 minutes bw: \$2.15 color: \$3.40 Skillful animation shows the functions of various teeth, the structure of a tooth, and how decay spreads. Students are motivated to proper dental care as a means of insuring dental health.

TENNIS: COURT FAVORITES (rko)

h-c-a 7 minutes bw: \$1.65 High points of the game featuring former tennis champions Bill Tilden, Vincent Richards, Karel Kozeluh, George Lott, and Bruce Barnes.

TENNIS FOR BEGINNERS (of)

i-j-h 9 minutes bw: \$1.65 Former tennis champion Bill Tilden narrates and appears in the film to teach a boy how to play tennis. The boy is shown attempting each step, and the film ends with the beginner and the expert playing a game.

TENNIS TACTICS (tfc)

j-h-c 10 minutes bw: \$1.65 Here Fred Perry shows us the technique in practicing for sustained relays and for short placement. This is followed by illustrations of teaching technique for service, pivot shots, a spinning ball, and a service stance. Slow motion photography is used extensively. Restricted to classroom use.

TENNIS TECHNIQUE (rog)

j-h-c-a 9 minutes color: \$3.15 Illustrates forehand and backhand techniques, service, and volley. Explains and demonstrates the techniques of group teaching. Includes sequences of Pauline Betz in action.

TERRIBLE TRUTH (sd)

j-h-c-a 10 minutes bw: \$2.15
Documents the story of one teen-age girl, typical of youthful addicts. Starting with an occasional marijuana cigarette, she is induced to experiment with a "fix" of heroin. In a few days she is a hopeless "hype," ends up with a criminal record and a blighted future. Judge William T. McKesson of the Los Angeles Juvenile Court appears in the film to present the argu-

ments against having any contact with drugs in any form.

THAT MOTHERS MIGHT LIVE (+fc)

h-c-a 9 minutes bw: \$1.65 Tells the story of the fight of Dr. Ignaz Semmelweis against child-bed fever, including his discovery that the disease was spread by germs and the publication of his experiment. Restricted to classroom use.

THEY GROW UP SO FAST (gi)

c-a 25 minutes color: \$6.65 Designed to highlight the reasons for and content of a good program of physical education. The attention of the community is called to the importance of adequate leadership and facilities for a complete program of physical education, and as a result action is taken by which children are given the opportunity to participate in a wide variety of experiences provided by physical education activities.

THRILL A SECOND, A (uw)

j-h-c-a 11 minutes bw: \$1.70 Sensation-seekers, both men and women, risk their lives to give performances of thrills. Parachuting, human cannonball, slide for life, racing auto smash-ups, and bug-boat marathon are shown.

THRILLS OF THE SURF (ifi)

j-h-c-a 7 minutes bw: \$1.90 Describes in action photography the adventures of life guards and water sports experts in the exciting drama of surfboard riding, water skiing, and surf boat races. Filmed in Australia where long, mountainous waves break on the beaches. The life guards' festival, annual celebration of surf sports, is described.

THROWING IN BASEBALL (eb)

j-h 11 minutes bw: \$2.15 Explains the various techniques to be mastered in learning to throw a baseball effectively, including proper stance and grip. Professional players furnish demonstrations which are made remarkably clear by such unique motion picture devices as stopmotion, slow-motion, and close-up photography. Four throws are analyzed: the overhand, the three-quarter, the sidearm, and the underarm.

THURSDAY'S CHILDREN (bis)

h-c-a 22 minutes bw: \$3.40 A skillful teacher works with a group of deaf children, ages four to seven. Traces the growth of understanding in these children

from complete ignorance of words to lip reading. Later they are taught to speak by reproducing the sounds.

TIGHT LINES (nfbc)

general 17 minutes color: \$2.15 Copious lakes and streams, natural settings of unsurpassed beauty, and the provincial government's continuous fish-stocking program assure full pleasure for the native British Columbian and visitor alike. The film provides a colorful sampling of the kind of sport awaiting the fishermen, young or old, expert or amateur.

TIME AND TWO WOMEN (acs)

c-a 20 minutes color: \$2.15 Explains the early symptoms of uterine cancer and the necessity for early treatment. For women only.

TOBACCO AND THE HUMAN BODY (eb)

j-h-a 17 minutes bw: \$3.40 An authentic report on the scientific results of modern research, evaluating the effects of the use of tobacco. Analyzes tobacco smoke, demonstrates some of the psychological effects of smoking, and sums up factors to be considered in deciding whether or not to smoke.

TOUCHDOWN THRILLS OF 1949 (of)

j-h-c-a 9 minutes bw: \$1.70 Highlights of the following games: Army-Pennsylvania, Tulane-Georgia Tech, Cornell-Pennsylvania, Notre Dame-Southern California, Army-Navy, and Notre Dame-Michigan.

TOUCHDOWN THRILLS OF 1950 (of)

j-h-c-a 9 minutes bw: \$1.65 Highlights from the following football games of the 1950 season: Purdue-Notre Dame, Army-Harvard, Kentucky-Georgia Tech, Ohio-Northwestern, Texas-Southern Methodist, Princeton-Cornell, and Oklahoma-Texas.

TOWN AND COUNTRY RECREATION (ai)

c-a 22 minutes color: \$5.95

Here is a power-packed story of the building of recreation programs in rural areas and villages of less than 5,000 population. You see what happens to a sleepy town when a recreation program comes to life, through voluntary leadership, and grows into a year-round public supported program. Explains basic recreation planning and organization, financing, building of facilities, utilization of local resources, de-

velopment of enthusiasm, and group action. Shows where to get help and how to utilize it.

TRACKING THE SLEEPING DEATH (Hc)

j-h-c 11 minutes bw: \$1.65 David and Mary Bruce, who have fought plagues and epidemics in all parts of Africa, are sent to Uganda by the British government to search for the cause of the sleeping sickness plague that has broken out among the natives. They eventually discover that the germ is carried by the Tse-tse fly. Restricted to classroom use.

TRAGIC HOUR OF DR. SEMMELWEIS, THE (YOU ARE THERE) (cbs)

j-h-c-a 27 minutes bw: \$5.65 The story of Dr. Semmelweis's dismissal from the Vienna Hospital because of his fight to prevent childbed fever. His struggle is highlighted by his accusation that the medical profession is inattentive to sanitary conditions.

TRAMPOLINE FUNDAMENTALS (bfs)

j-h-c-a 11 minutes color: \$3.80 An instructor and a group of high school boys and girls demonstrate the basic fundamentals of trampollning. Shown in detail are the landing positions, aerial positions, front and back flips (with spotters), and combinations of these fundamentals which lead to a variety of stunts for the advancing student. Stressed are the importance of safety measures and the need to practice each step until it is thoroughly learned.

TRIUMPH OF LOUIS BRAILLE, THE (YOU ARE THERE) (cbs)

j-h-c-a 27 minutes bw: \$5.65 A new hope for the sightless materializes as the brave, blind Frenchman makes his plea for the adoption of his system of teaching the blind to read.

TRIUMPH WITHOUT DRUMS (tfc)

j-h-c 11 minutes bw: \$2.15 Reviews the thirty-three-year vigil of Harvey Wiley and his efforts in Congress to secure a Pure Food and Drug Act. By chemical tests and analysis Wiley proves that meats and canned goods must be clean and pure and that sanitation and good health depend upon the pureness of foods. By virtue of a convincing demonstration Wiley secures passage of the law and government supervision of food and drugs. Restricted to classroom use.

TUBERCULOSIS, ITS DIAGNOSIS, TREATMENT, CONTROL (eb)

j-h-a 10 minutes bw: \$2.15 Tells the story of a girl who contracts pulmonary tuberculosis. Describes, through animation, the process of primary infection and reinfection. Demonstrates tuberculin tests and X-ray examinations and describes effective hospital treatment, including rest, good food, fresh air, sunshine, and clean-

UNDERSTANDING BASKETBALL (ya)

i-j-h 9 minutes bw: \$2.15 Two teams demonstrate as a basketball coach explains the basic rules and play of the game, including such things as scoring, fouls, out-of-bounds, and jump ball. He also points out the common rules of courtesy to be followed by spectators.

UNDERSTANDING VITAMINS (eb)

h-c-a 14 minutes color: \$5.15 Graphically explains what vitamins are, how they work, and why they are necessary for good health. Points out natural sources of important vitamins and reveals the effects on body tissues of a diet lacking in certain vitamins. Re-creates major events in the discovery of vitamins and calls attention to present-day research.

VICTORY OVER POLIO (cbs)

h-c-a 27 minutes bw: \$5.35 The dramatic story of man's fight against the dread crippler, polio. After years and years of research by scientists the world over, Dr. Jonas Salk finally develops an effective vaccine. Originally appeared over television in the Twentieth Century Series.

VIM, VIGOR, AND VITAMINS (bfs)

j-h-a 9 minutes bw: \$2.15 Discusses each vitamin, its richest food sources and ways of including the necessary vitamins in a day's menu.

VITAL SIGNS AND THEIR INTERRELATION: BODY TEMPERATURE, PULSE, RESPIRATION, BLOOD PRESSURE (uw)

c-a 30 minutes bw: \$3.90
Physiology of the respiratory, heat regulatory, and circulatory systems and their interrelation in normal functions and in deviations from normal are described. It also develops the concept of how to ascertain and record the vital signs, the importance of making thorough observations, and how to take care of equipment.

VOLLEYBALL FOR BOYS (c)

i-j-h 10 minutes bw: \$1.90 The film shows in regular and slow motion photography the proper methods of serving, volleying, spiking, defensive play and various drills to develop such skills.

VOLLEYBALL STRATEGY FOR GIRLS (ya)

j-h-c 9 minutes bw: \$2.35 Explains offense and defense patterns and strategy built around the use of fundamental skills already learned. Discusses playing positions, serve placement, 1-2-3 attack, 1-2 attack, single attack, spiking, blocking, rotation, and other items.

VOLLEYBALL TECHNIQUES FOR GIRLS (ya)

j-h-c 11 minutes bw: \$2.35 Shows a variety of basic playing skills using animation and slow motion photography to analyze the basic techniques involved in such ball handling skills as overhand volley, spiking, underhand volley, blocking, serves, and others.

WARNING SHADOW, THE (acs)

c-a 17 minutes color: \$2.15 Makes an appeal for men over 45 to have chest X-rays taken twice a year. Discusses the characteristics of cancer and emphasizes early diagnosis and treatment.

WASTAGE OF HUMAN RESOURCES (eb)

j-h 10 minutes bw: \$2.15 Graphically points out the human wastage, at all age levels, caused by crippling disease, careless accidents, juvenile delinquency, unemployment, alcoholic and drug addiction, mental disease, crime, war, and bad living conditions.

WATER DAREDEVILS (uw)

j-h-c-a 7 minutes bw: \$1.70 Shows comedy divers, water skiing, and boat racing. Full length aquatic fun.

WATER SAFETY (ya)

i-j-h 11 minutes bw: \$2.15 A discussion of the elementary principles of water safety for those who swim and boat in all types of water areas.

WATERWAYS AND FLYWAYS OF THE NORTH (nfbc)

j-h-c-a 17 minutes color: \$2.15 Depicts the sport and vacation pleasures that lie in store in Manitoba's northern lakelands. Once the domain of the trader and the trapper, this region now offers rich rewards to the fisherman and the hunter.

WEIGHT EVENTS (eb)

j-h 10 minutes bw: \$2.15 Demonstrates champion form in the shot put, discus throw, hammer throw, and javelin events. Slow-motion photography facilitates careful study of correct form. Correct beginning stance, body poise, grip, and foot and leg action are emphasized.

WELTON - A HEALTHY COMMUNITY (uwa)

h-c-a 31 minutes color: \$7.65 By explaining the way which one diphtheria case was quickly tracked down, isolated, and kept from spreading, the film gives a picture of how a modern, full-time public health department serves the community.

WHAT IS DISEASE? (uw)

i-j 11 minutes color: \$2.70 Using animation, this film presents illustrations to show how disease enters the body. Explains that harmful microbes may be air borne, water borne, transmitted by insects, or even harbored in the soil. Use of the microscope to study microbes is included. A Walt Disney Production.

WHAT MAKES US GROW? (nfbc)

i-j 11 minutes bw: \$1.90 Experiments with rats show the harmful results of vitamin deficiencies, and children are advised to eat more eggs, fresh vegetables, and fruit. Emphasizes that a well-rounded diet is essential for proper growth.

WHAT WE EAT WE ARE (a)

j-h-c-a 17 minutes color: \$2.15 Stresses the importance of properly planned diets. Shows a variety of salads, desserts and special dishes using bananas for supplying nourishment and attractiveness.

WINTER SPORTS (of)

j-h-c-a 8 minutes bw: \$1.70 Champions demonstrate skiing, skating, to-bogganing, bob-sledding, ice sailing, and snow trotting.

WITCH DOCTOR (brf)

h-c-a 9 minutes bw: \$2.35 A dance stylization of a voodoo rite performed by a Haitian witch doctor, with Jean Leon Destiné dancing the title role. Original story and choreography by Jean Leon Destiné, using authentic native themes.

WONDER DOGS IN ACTION (uw)

j-h-c-a 10 minutes bw: \$1.70 Foxhounds, setters, pointers, poodles and Chesapeake retrievers are shown in actual hunting scenes, from the treeing of an Arizona wildcat to the retrieving of a Mallard duck.

WONDER ENGINE OF THE BODY (br)

j-h-c-a 11 minutes bw: \$2.15 Explains the anatomy, physiology and proper care of the human heart.

WONDER OF REPRODUCTION, THE (mis)

i-j 12 minutes color: \$3.50 Two boys and a girl come to see Uncle Bob's new fish. In one aquarium they see the beautiful Siamese fighting fish building its characteristic bubble nest to house the eggs. Following sequences show the courtship, egg-laying, fertilization, and hatching of the eggs. In the second aquarium the reproduction process of the Egyptian Mouthbreeder is witnessed. The female carries the eggs in her mouth for about 15 days, taking no food during this time. This picture will help children form a wholesome picture of the reproductive process.

WORK OF THE BLOOD (eb)

j-h 14 minutes color: \$4.20 Through laboratory analysis of a blood sample, the structure of blood cells and the composition of plasma are revealed. Animated drawings and X-ray motion pictures of the circulatory system illustrate the function of the blood—the circulation of food elements and other materials to all body cells, the removal of wastes, the equalization of heat distribution, and the defenses against disease.

WORK OF THE KIDNEYS (eb)

j-h-c 11 minutes bw: \$2.15 Animated drawings, together with laboratory demonstrations, describe the renal system, the formation of urine, regulation of blood composition, and the functioning of the bladder. Relation of blood pressure to urine flow, and rate of secretion as affected by sugar, water, and temperature, are given particular consideration. The film concludes with an analogy between kidney function and the action of a gyroscope.

WORLD SERIES, 1946 (ihsa)

general 30 minutes bw: \$2.15 Glimpses of the all-star game between the American and National League and of the World Series between the Boston Red Sox and the St. Louis Cardinals.

WORLD SERIES OF 1947 (SHORT VERSION) (of)
general 7 minutes bw: \$1.70
Highlights of the entire series, the sensa-

tional struggle between the Yanks and the Dodgers. See all the exciting plays by Dimaggio, Henrich, Walker, Robinson, Reese, and Stanky.

WORLD SERIES, 1947 (ihsa)

general 39 minutes bw: \$2.15 Shows the actions and highlights of the series. Gives complete coverage of the games.

WORLD SERIES OF 1948 (ihsa)

general 36 minutes bw: \$2.15 Shows the highlights of the World Series between the Cleveland Indians and the Boston Braves.

WORLD SERIES OF 1949 (ihsq)

general 33 minutes bw: \$2.15 The Yankees trip the Dodgers, four games to one, to take the 1949 World Series. Allie Reynolds and Preacher Roe trade 1-0 shutouts in the first two games, and the Yankees take the next three in a row to clinch an exciting series.

WORLD SERIES OF 1950 (ihsa)

general 30 minutes bw: \$2.15 Shows the highlights of the games between the New York Yankees and the Philadelphia Phillies.

WORLD SERIES OF 1951 (ihsa)

general 40 minutes bw: \$2.15 Pictures the highlights of the games between the New York Yankees and the New York Giants.

WORLD SERIES OF 1952 (ihsa)

general 32 minutes bw: \$2.15
The highlights of the games between the
New York Yankees and the Brooklyn
Dodgers.

WRESTLING FUNDAMENTALS AND TECHNIQUES: PART I, TAKEDOWN AND COUNTERS (umi)

h-c 11 minutes bw: \$2.15 A photographic study of the points to be observed in this phase of wrestling.

WRESTLING FUNDAMENTALS AND TECHNIQUES: PART II, ESCAPES AND REVERSALS (umi)

h-c 11 minutes bw: \$2.15 Points out the "how to" of escapes and reversals.

WRESTLING FUNDAMENTALS AND TECHNIQUES: PART III, RIDES AND PIN HOLDS (umi)

h-c 22 minutes bw: \$3.65 Studies the fundamentals of rides and pin holds in amateur wrestling.

WRESTLING THRILLS (of)

h-c-a 8 minutes bw: \$1.70 Grunts and groans from the padded arena. Plenty of thrills and laughs as the men and women wrestlers go through frantic antics that end up in a sizzling battle royal.

YELLOW JACK (tfc)

j-h 29 minutes bw: \$4.65
Depicting the work of Dr. Reed and his colleagues in Cuba, this excerpt from the feature photoplay visualizes the manner in which the Yellow Fever Commission wiped out "yellow jack." Balked in his efforts to find a cure, Dr. Reed decides to test the theory of Dr. Carlos Finlay, whose studies had convinced him that the stegomyia mosquito is the carrier of the disease. Dr. Reed calls for volunteers who will risk their lives in an experiment, and five American soldiers agree to submit themselves to the test. The results proved that the stegomyia was the carrier, and by wiping out the mosquitoes, the Commission eliminates the disease in Cuba. Restricted to classroom use.

YOSHI NO YAMA (A CLASSICAL JAPANESE DANCE) (brf)

h-c-a 20 minutes color: \$7.10 A single dancer tells the story of three friends of different temperaments with the unusual choreographic use of the onstage-hand (or "figure in black"). A preface shows the application of Kabuki makeup, and the dance itself, a Buyo dance with the stylization and refinement of the Noh tradition, is performed with masks and characteristic folk humor and art.

YOUR BODY DURING ADOLESCENCE (mcgh)

j-h-c-a 10 minutes bw: \$2.35 Teenagers, between the ages of 13 and 15, have a wide range of sizes and shapes. They are changing from childhood to adulthood during these years. The functions of the glands and how they influence growth are explained.

YOUR CHILDREN WALKING (mcgh)

c-a 19 minutes bw: \$4.15 A review of different types of feet and their normal functions is followed by suggestions to parents on the care of children's feet. Advises on how to select and care for shoes and socks, the need for sufficient exercise, and the necessity of consulting a doctor about correcting foot troubles or purchasing proper fitting shoes.

YOUR CHILDREN'S EARS (bis)

general 16 minutes bw: \$3.15 Few people are born deaf, and all too fre-

quently loss of hearing in later life is due to carelessness and ignorance. In this film, the physiology of the ear is explained in detail by animated diagrams. Often children who appear dull and unresponsive are suffering from hearing difficulties, which can easily be cleared up if given proper medical attention.

YOUR CHILDREN'S EYES (bis)

h-c-a 20 minutes bw: \$3.15 Rest, recreation, and good food are necessary to healthy eyesight. Medical advice must be sought in cases of organic defects or diseases, but the application of logical common sense in daily life will keep a healthy eye healthy. Amusing animated diagrams depict the physiology and care of the eye.

YOUR CHILDREN'S TEETH (bis)

h-c-a 12 minutes bw: \$2.65 The film explains the structure of first and second teeth. The child should be given a well-balanced diet and taught the proper method of brushing the teeth. Decay should be attended to at once, for in its advanced stages it may poison the whole system.

YOUR DOCTOR (mcgh)

j-h-c-a 15 minutes bw: \$3.75 Surveys the various services which doctors perform for mankind. Features the work of a general practitioner in the mountains of North Carolina who must travel by jeep to reach many of his patients. Highlights the work of the American Medical Association and tells of the education and training that students receive before they get their M.D. degree.

YOUR EARS (ya)

i-j-h 9 minutes bw: \$2.15 Illustrates the construction of the human ear and the function of each of its parts. Discusses the manner in which certain diseases cause deafness, and stresses the necessity for proper care of the ears. Shows how sound waves are transmitted to the brain.

YOUR EYES (ya)

j-h-c 9 minutes bw: \$2.15 Animation and photography are used to show the structure and function of the eye. Explains farsightedness and nearsightedness and the ways of correction. Stresses the importance of proper care of the eye and its component parts.

YOUR HEALTH AT HOME (c)

i-j 10 minutes bw: \$2.15 Shows that personal cleanliness, proper rest, good food habits, and cheerful, friendly attitudes on the part of the family members all contribute to a healthy, happy home.

YOUR HEALTH AT SCHOOL (c)

i-j 10 minutes bw: \$2.15 Illustrates what the school does to provide a pleasant, clean, and healthful atmosphere. Indicates that children can help by observing good personal health habits and by promptly reporting illnesses or injuries to their teachers.

YOUR HEALTH DEPARTMENT (nmp)

j-h-a 20 minutes bw: \$3.55 The activities of the public health department are many and varied. Following are but a few of the areas in which the health department concerns itself: veneral disease, childbirth, tuberculosis, immunization, communicable diseases, pasteurization of milk, purification of water. Although produced in 1941, the functions depicted in this film are still practiced.

YOUR HEALTH: DISEASE AND ITS CONTROL (c)

i-j 9 minutes bw: \$2.15 Shows how harmful microbes are carried and spread and how they enter the body and get beyond the body defenses to cause sickness. Encourages children to help control disease by protecting themselves from disease carriers and by building up their body defenses.

YOUR HEALTH IN THE COMMUNITY (c)

i-j 10 minutes bw: \$2.15 Depicts the services of a public health department and other departments aimed at maintaining and improving the health of the community and suggests how the individual may cooperate in his community's health program.

YOUR TEETH (ya)

i-j 10 minutes bw: \$2.15 The growth and structure of teeth, how the baby teeth grow and are replaced by permanent teeth, the parts of a tooth and the manner in which a tooth decays are all shown. The importance of proper food and proper care in building strong teeth and preventing tooth decay is stressed.

YOUR VOICE (eb)*

j-h 10 minutes bw: \$2.15 The four phases of voice production are explained: respiration, phonation, resonance, and articulation. Real-life photography shows the vocal folds in operation. Exercises for the improvement of the voice are suggested.

YOU'RE GROWING UP (bfs)

i-j-h 10 minutes bw: \$2.35 This film deals with some of the complicated physical and emotional processes of growing up. Four major periods of physical growth are considered: 1. Birth to age three, 2. age four to ten, 3. 11 to 16, 4. 17 to age 20. The film discusses the normality of individual differences and attempts to alleviate some of the fears resulting from natural physical and emotional changes.

YOU'RE THE DOCTOR (aho)

h-c-a 19 minutes bw: \$3.15 Stresses the important role of the hospital in community life, and the various professional services available to patients in the hospital.
